The World of FIFTYEIGHT PRODUCTS

We Love What We Do!

The reason why we started our label FIFTYEIGHT PRODUCTS was simple. We wanted a platform to combine our two major passions: On one hand, our love for computer-generated 3D-animations with a focus on emotionally engaging characters, which we bring to (digital) life for brands and advertising clients through our award-winning studio, FIFTYEIGHT ANIMATION. And on the other hand, our enthusiasm for quality products with exclusive designs created from high-grade porcelain, 100% Made in Germany.

Created with a love for detail, our unique TASSEN range brings high-grade porcelain products with emotionally appealing facial expressions to the table. Over the years, the assortment has grown organically to include bowls and cups in a broad range of sizes and colors, as well as egg cups, plates, cutting boards, and the popular tea pot – now joined by the little jolly jug.

Expanding our product line-up with a brand-new category, please welcome our new LAID-BACK Vase. This marks our very first porcelain product designed solely for decorative purposes – but maintaining all the emotional charms of our TASSEN range.

Bringing the connection between products and computer animation full circle, the video clips of our „talking cups“ have long since become international fan favorites. Also available in English language versions, these short animated films have generated millions of views on YouTube together with a growing stream of fan requests asking for one thing: more!

Our TALENT Series pays homage to brilliant artists, who have enriched our planet’s cultural heritage with their luminary works. The likenesses of influential composers and poets are rendered three-dimensionally with sculpted details in premium porcelain coffee cups that are guaranteed conversation starters.

100% Made in Germany.
