Meditech Expanse COVID screening indicators

Updated EHR 1st Point of Contact Screenings

Determination of COVID-19 RISK screening status is identified within the screen settings predetermined based on CDC recommendations.

The following scenarios will result in a positive COVID-19 risk screening status:

- 1 symptom (fever stated or recorded, cough, stated SOB) + ILI contact
- 1 symptom (fever stated or recorded, cough, stated SOB) + Travel outside of the US
- Any 2 symptoms (fever stated or recorded, cough, stated SOB)
