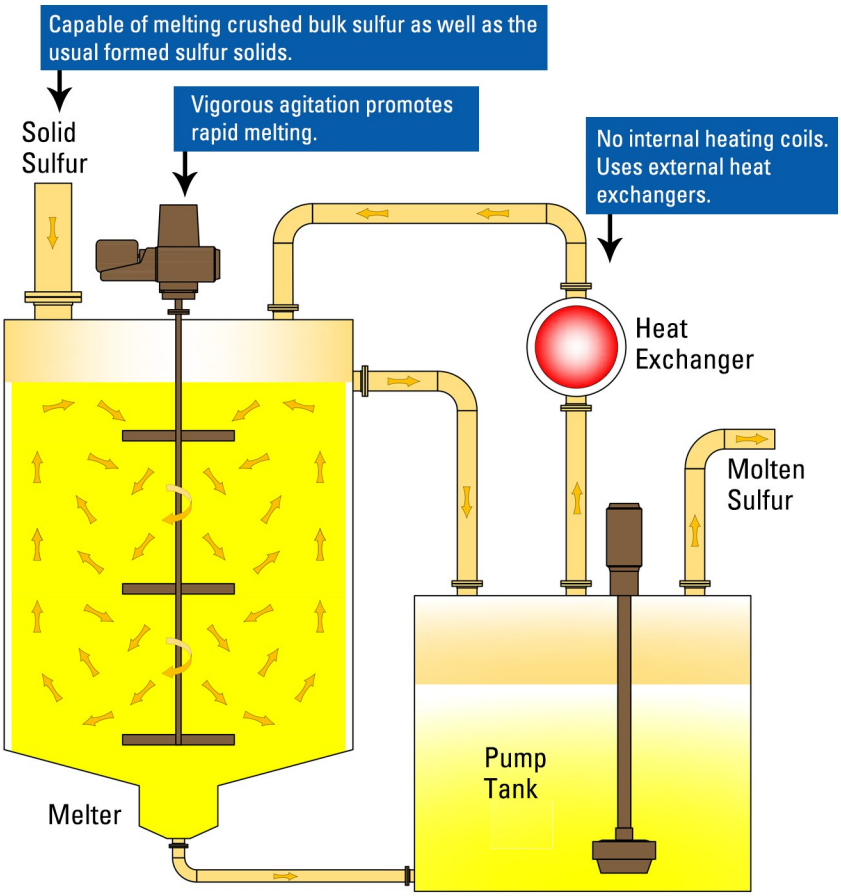
CTI CONSULTING
HI-CAP SULFUR MELTING

DEVCO DELIVERS TURN-KEY SOLUTIONS FOR SULFUR PROCESSING AND HANDLING USING CTI CONSULTING'S HIGH CAPACITY SULFUR MELTER DESIGN.



KEY FEATURES

Proven technology, high volume sulfur melting units with capacities up to 3,600 tonnes per day.

Reliable, heavy-duty mixing and agitation system.

Customizable to meet specific customer requirements.

Can handle high levels of moisture (6%), acid (.3%), non-meltable solids, and other contaminants.

All vessels and equipment are above ground, no sulfur pit required.

All molten sulfur is contained during unplanned shutdown.

Access hatches allow cleanout of non-meltable solids.

Modular construction for easy shipment and on-site assembly.

Minimizes on-site construction time, reducing associated costs and risks.
