BENEFITS OF WORKING WITH H2O

A Complete Solution

Only H2O offers a complete solution to Biofouling control. We combine the most effective dosing recommendations with turnkey new system supply, retrofit, or refurbishment of existing dosing and biocide-generating equipment, including sodium hypochlorite generators.

Experienced, Diverse Team

H2O has put together a team of some of the most experienced engineers and biologists in the world who have authored dozens of academic articles and implemented hundreds of Biofouling control systems across the globe.
