Botanical Name: Citrus Sinensis
Country of Origin: United States
Item Number: 50-6200-01

Orange Sweet Oil is often used as a digestive stimulant and it excites the bees and encourages feeding. Orange Sweet Oil is also used to provide fragrance to a number of beeswax products including lip balms, soaps, lotions and such. Orange Sweet Oil is also used to provide fragrance to a number of beeswax products including lip balms, soaps, lotions etc.

Orange oil is extracted from the orange peel by cold-pressing and yields 0.3 -0.5 %. It becomes a yellowish orange to dark orange liquid.

Sweet Orange is derived from an evergreen tree. It is smaller than the bitter orange tree, and less hardy with fewer or no spines.

The fruit itself has a sweet pulp with no bitter membrane. For people who practice aromatherapy, sweet orange essential oil is used to elevate mood, as it is believed to stimulate happy, warm feelings. The oil is also used to treat digestive complaints, and in a diluted form, it may be applied to the skin to treat dry, flaky, irritated skin. Sweet orange was brought to Europe by the Arabs in the First century along with the bitter orange.
