SHARP

Data Capture

What is Sharp Data Capture?

Sharp Data Capture is a powerful and user-friendly tool for capturing and processing documents.
Customised profiles offer one-touch automated processes.
Utilise Sharp hardware and intelligent software to drive productivity and digitise your work environment.

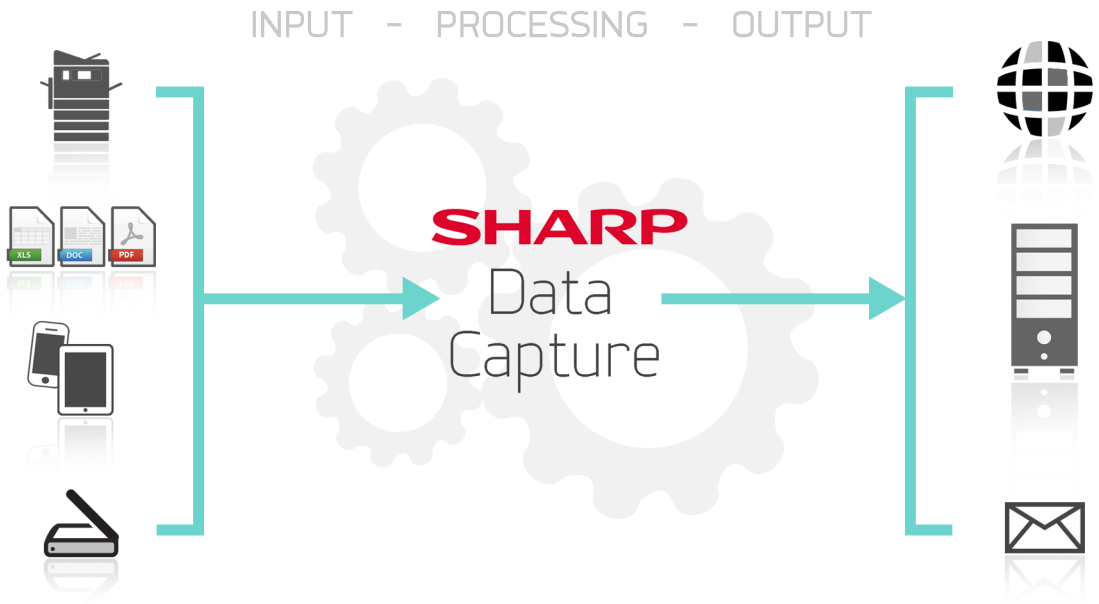
Features

Cost-Saving Autonomy
Capture documents electronically to cut costs and time.

Platform integration
Flexibility to many line of business applications.

Easy to Implement
The intuitive design ensures early adoption from staff.

Standardised Process Through Automation
Ensure data integrity by eliminating human error.



Key Benefits

- **Productivity:** Process documents faster, reduced hard-copy cost, automate document naming & routing.
- **Security:** Control user access, secure important documents, facilitate corporate governance.
- **Usability:** One-touch image capture & routing, quick 3-step workflow creation.
- **Integration:** Centralised admin access, email, fax and other document management systems.

SHARP

Data Capture

Capture Information From:

- Multifunction peripherals (MFPs)
- Smartphones
- Copiers
- Scanners
- Desktops
- Microsoft® Office® applications
- Email client
- Email inbox
- Directory (network or local)
- Email (SMTP, POP3, IMAP)
- Fax servers

- FTP sites (secure and unsecure)
- Files (batch, XML, delimited formats, ASCII)
- PC desktop
- XML

Device Features:

- Device importing & grouping (Sales, Marketing, Accounting, Post Office, etc.)
- One-Touch Multi-route
- Scan settings granularity controls
- Bi-directional database lookups
- Integrated LDAP connection
- Various index fields
- Encryption of jobs
- Generation of menus / forms

Enterprise Features:

- Clustering
- Load balancing
- Multi-CPU capable
- Multi OCR engine capable
- Centralized management

Process Using:

- Full text recognition
- Zonal text recognition
- Forms Recognition (Structured/Semi-Structured)
- Optical Mark Reading (OMR)
- Image Clean-Up
- MRC PDF Compression
- Barcode Recognition (1D/2D)
- Bates Stamp
- Encryption/Decryption
- Watermarking
- Reporting
- Automated Email Notification

Route Information Directly to:

- Network Folders
- Email
- Fax servers
- Printers
- ODBC-compliant databases
- Send to HTTP
- Secure FTP sites
- Send to XML & WebDav
- Document Management Systems and Cloud Services from vendors such as Microsoft®, Google®, EMC®, OpenText®, FileNet®, Interwoven®, IBM®, Docuware®, and more.)
- CSV, command files
- Captaris RightFax™

Security Features:

- Authentication (Common Access Cards, Windows, Active Directory, LDAP)
- Restricted network access
- Outbound fax or email validation
- Outbound fax filtering
