

iTrak[®] BI

Business Intelligence Dashboards & Data Visualization

Flexibility

- iTrak BI integrates seamlessly with the iTrak Incident Reporting & Risk Management System
- iTrak BI adapts to your business so that you don't have to adapt to the product
- Project based approach to interactive data visualizations
- Web-based technology lets user create, view & interact with dashboards directly in a web browser

Powerful Analytics & Personalized Dashboards

- Works with existing iTrak modules and data
- Employs drag and drop Virtual Tables, Dimensions, Datasets, and Key Performance Indicators to simplify dashboard creation
- Filter, drill down pop-up and hover-over data analysis capabilities
- Export the results to Microsoft Excel, PowerPoint, CSV, PDF and Image for reference as required
- Includes built-in standard, financial and statistical formulas to provide comprehensive analysis
- Complete custom and interactive capabilities for end user engagement
- Apply comments and mark-up to live data on-the-fly for collaboration
- HTML5 & mobile support

Cost Efficient

- Automate manual processes and save time
- Improve processes and speed up decision-making with factual data analysis
- Optional OLAP and virtual cube connectivity for BI extension and 3rd party big data analysis

iView's iTrak BI (Business Intelligence) Dashboarding software is a web-based platform for interactive data visualization. iView's iTrak BI lets users build and publish required metrics and key performance indicators relevant to their business. Equipped with logical chart, gauge and visualization selection that includes filtering, formatting and sorting, iTrak BI quickly and effectively allows users to create and distribute dashboards for the enterprise, enabling rapid development of custom, interactive dashboards for the iTrak Incident Reporting Platform. It acts as a central BI portal for your security, surveillance and associated iTrak departments, allowing users to visualize and analyze data from across the organization.

Using virtual tables, dimensions, datasets, KPIs and drill down data analysis – iTrak BI provides detailed Dashboarding via charts, gauges, maps and other tools. iTrak BI analysis allows discovery of trends and significant insights within existing iTrak modules and data, while providing analysis sharing through collaboration.

Users can quickly create reports and receive up-to-the-minute analysis of all areas of their iTrak deployment, while defining their own dashboards by dragging and dropping metrics, dimensions and filters onto a grid or chart.

iTrak BI Dashboards come with more than 50 powerful data visualization controls including interactive charts, gauges, maps, scorecards and more, ensuring that users always have the right data visualization for the information they need to display.

Note, these requirements are preliminary and may change. Please confirm client and server capabilities prior to purchase.

iTrak Client Software

- Microsoft® Windows 7
- Microsoft® Windows 8
- Windows Server 2003 Sp2
- Windows Server 2008 R2
- Window Server 2012
- Internet Explorer 9.0 or higher
- Microsoft Silverlight

iTrak Client Hardware

- Pentium 4 or higher
- 1 GB min. req. (2+ GB recommended)
- 1 GB available disk space
- 1024 X 768 resolution or higher
- Network Card (Networked installations)
- Mouse

SQL Server Software

- Microsoft® SQL Server 2005
- Microsoft® SQL Server 2008
- Microsoft SQL Server 2008 R2
- Microsoft SQL Server 2012

SQL Server Hardware

- Pentium 4 2.4 GHz or higher
- 2 GB RAM (4+ GB recommended)
- 5+ GB available disk space (RAID, SCSI with 10+ GB free space)
- 1024 X 768 resolution or higher
- Network Card (Networked installations)
- Mouse

Microsoft® SQL Server™ 2005

- Microsoft SQL Server 2005 installed

Microsoft® SQL Server™ 2008

- Microsoft SQL Server 2008 installed

Microsoft® SQL Server™ 2012

- Microsoft SQL Server 2012 installed

* SQL licences are not included in the price of the software.
