- Web pre-registration and walk up self serve options
- Integrated simple or complex approval process
- Auto visitor QR Code Scanning Sign In

Powerful

- Integration with existing subjects, contacts and personnel
- Internet and intranet capable
- Multiple badge printer, web camera and signature capture options
- SSL (Secure Sockets Layer) capability

The iPass Self Service Visitor Management Kiosk software provides a visitor self-registration solution, that is optimized for busy buildings with high traffic or unsupervised lobbies. Combined with the iPass Visitor Management platform and iPass Visit Registration Web Portal, it delivers a highly scalable, enterprise class end-to-end visitor management system.

The iPass® Kiosk delivers easy to use self service visitor registration, sign in and badging. The touch screen capable iPass Kiosk Self Service software Module provides a visitor self-registration solution, that quickly processes approved visitors and reduces workflow, while maintaining all levels of visit security.

The iPass Kiosk guides new walk-up or existing pre-registered visitors through an easy to use intuitive step-by-step registration and sign-in process. Visitors can find and sign-in for existing pre-registered visits via their Smart phone, from an automated QR code based e-mail, by simply presenting their Smart phone on arrival. Additional configurable security and convenience features allow multiple self serve configurations including; visit filtering to allow daily or multi day visits, ID collection via scanner hardware, visit image capture, signature capture, custom form and disclaimer inclusion, custom badges, banned or watch visitor management, including visit denial and customizable branding of the kiosk software itself.

The iPass Visitor Management platform delivers simple and complex modes and approval requirements for any level of visitor management security. It also allows groups to be pre-registered via both the iPass Visitor Management module and Visit Registration Web Portal from Microsoft® Excel spreadsheets. The iPass Kiosk provides a streamlined registration process ensuring that the visitor is not on a list of banned persons and provides associated notifications that the visitor has arrived or is overdue for sign-out.

The iPass Visitor Management solution is available as a complete standalone package or as an integrated module and function within the iTrak Incident Reporting and Risk Management Platform, allowing complete inclusion in the incident management process from audit of onsite visitors to full visit investigation inclusion delivering a complete commitment to security and safety.

iPass Client Hardware

- X86 Dual Core @ 2.4 Ghz or higher
- 2 GB min. req. (4+ GB recommended)
- 1 GB available disk space
- 1024 X 768 resolution or higher
- Network Card (Networked installations)
- Mouse

iPass Client Software

- Microsoft® Windows XP SP2 or higher
- Microsoft® Windows Vista
- Microsoft® Windows 7
- Microsoft® Windows 8
- DirectX 9.0
- Internet Explorer 8
- Internet Explorer 9
- Microsoft Silverlight 4
- Adobe® Reader 10 or higher

Server Hardware

- X86 Quad Core @ 2.4 GHz or higher
- 4 GB RAM (8+ GB recommended)
- 10+ GB available disk space
- (RAID, SCSI with 10+ GB free space)
- 1024 X 768 resolution or higher
- Network Card (Networked installations)
- Mouse

iTrak Server Software

- Microsoft® Windows Server 2003*
- Microsoft® Windows Server 2008*
- Microsoft® Windows 2008R2*
- Microsoft® Windows 2012

* VMWare and Microsoft Virtual PC/Server environments are supported.
