

Riverhead Building Supply Hosts EPA RRP Training; Hauppauge on 2/28/11

Deadline to Register 2/24/2011

Renovate Right Pamphlet to be given to homeowners 7 days before job starts.

TIME RAN OUT ON 12/31/2010

The EPA Renovate, Repair and Painting Rule went into effect on 4/22/2010.

Named 40 CFR Part 745, this law requires that renovations performed for compensation on pre-1978 homes, must be done by EPA Certified Firms using Certified Renovators. This includes contractors, sub-trades as well as landlords and property managers.

The fines for non compliance are up to \$37,500 per violation per day.

Firms seeking certification must apply to the EPA and pay a fee. Contractors who work on pre-1978 homes, seeking to become a Certified Renovator, must successfully complete the EPA approved renovator course.

CONTRACTOR ALERT!

In the EPA Extension of 6/18/2010, the deadline to be RRP trained, expired on 12/31/2010. If you were not trained by 12/31/2010, you cannot legally work on homes with lead paint built before 1978 unless you have this certification.

- Who Must Take This MANDATORY EPA Training?**
- Remodelers/Carpenters/Handyman
 - Window/Siding/Gutter/Painting/HVAC & Roofing Contractors
 - Electricians, Plumbers, Plasterers
 - Flooring, Tile & Insulation Companies
