

Pre-Finishing Options for Hardwood Decking, Siding and Lumber

We are pleased to offer prefinished high-density hardwood decking, siding, and lumber for your outdoor project needs. Prefinishing exterior hardwood materials in a climate-controlled environment offers many benefits. Please understand that high-density hardwoods, by nature, accept various finishes irregularly. Differences in colors, finish absorption, and texture are to be expected.

Benefits of Pre-Finished hardwood decking, siding and lumber

- Better looking and cleaner finish than site applied finishes
- Improved performance of finish by evenly coating all sides
- Typically lower cost than site applied finishes
- Can significantly improve construction cycle time
- Minimizes scheduling conflicts on site with other trades
- Offers immediate protection for exterior hardwoods during the critical initial acclimation period
- Offers better short term and long term performance of the exterior hardwood
- Can limit the final coat on site to simple cleanups and touch ups

Services for Pre-Finished hardwood decking, siding and lumber

- Standard architectural finish samples and submittals available
- Custom architectural finish samples available. Depending on the complexity, cost of finishing and time required, custom finish and color samples will be quoted as requested. Typical cost is \$300.
- Standard finishes include Penofin® Hardwood Formula, or Seal-Once™ with Bronze Cedar semi-transparent tint.
- Penofin hardwood Formula is offered as a one coat finish applied on Ipe, Cumaru, Garapa, Machiche, and Jatoba decking, siding and lumber species as well as Santa Maria (siding only)
- Penofin Architectural Grade finishes are offered as a two-coat finish for high-density siding only.
- Seal-Once tinted finishes are available as a two-coat wet on damp finish application on siding only for the following species: Ipe, Cumaru, Garapa, Machiche, Jatoba, and Santa Maria.
- Additional custom finishes may be requested and quoted

Limitations of Pre-Finished hardwood decking, siding and lumber

- Natural variances of colors and graining of individual boards are an inherent characteristic of exterior hardwoods and are to be expected.
- The performance of each coating varies significantly as a result of many factors. General Woodcraft makes no claim as to the performance or suitability of any finishes provided.
- No warranty regarding finishes, expressed or implied, is provided, or offered by, General Woodcraft.
- Any warranty offered by the coating manufacturers are the exclusive responsibility of the individual purchasers and the coatings manufacturers.

CUSTOM SAMPLE / FINISH SELECTION

Client Name:	Order#:	Cost \$
Project Name:		
Finish: MFR / Code / Color		
Species / Size / Length / Type / Qty:		

I have read and understand all of the above information. I also understand that pre-finished materials are custom made and non-returnable. Please proceed with my order. Accepted by:
