

**Packaging Manufacturer Valley Box Company Announces
ITAR Registration and Compliance**
Fulfilling Sub-Contractor Contracts for Government Contractors

San Diego, California, June 19, 2012 - [Valley Box Company](#), a Southern California industrial packaging manufacturer, announces their International Traffic in Arms Regulations (ITAR) Registration and Compliance to fulfill extensive contracts from Government Contracting Primes as a diverse sub-contractor.

ITAR Compliance

For a company involved in the manufacture, sale or distribution of goods or services covered under the United States Munitions List (USML) or a component supplier to goods covered under USML, the contractual stipulation or requirement of being "ITAR compliance" means that the company must be registered with the State Department's DDTC, if required, as spelled out on [DDTC's website](#) and the company must understand and abide by the ITAR as it applies to their USML linked goods or services. The company themselves is certifying that they operate in accordance with the ITAR when they accept being a supplier to the USML prime exporter. "In other words, to be ITAR Compliant, a USML company needs to Register with DDTC and know what is required of them to be in compliance with the ITAR and self certify that they possess this knowledge," says Jim Becker, Senior [Field Technician](#) for Valley Box. "More and more companies are requiring that members of their supply chain be ITAR registered, being ITAR compliant is very important to Valley Box because we're fulfilling more extensive contracts from Government Contractors."

About Valley Box Company

Valley Box Company supplies complex industrial packaging to local and national defense and aerospace contractors, for products ranging from replacement helicopter engine reusable-shippers to unmanned aircraft wing sets, and being ITAR Registered is a natural progression to the growth and expansion of the company.

Since 1965, Valley Box has been a fixture of San Diego's packaging industry providing high-quality [custom crates](#), [heat-treated export containers](#), [anti corrosion barrier bag packaging](#), and [production packaging processes](#). Specializing in tackling packaging challenges faster and smarter than the competition, including [crating solutions](#) for over-size products, [shock-resistant](#) crating for sensitive equipment, [structural welding](#) and effective [moisture resistant](#) packing and materials.

Valley Box Company's products range from [stock corrugated](#) to complex engineered designs for defense, aerospace, biotech and commercial applications.
