of digital data saves roughly 50 trees worth of paper

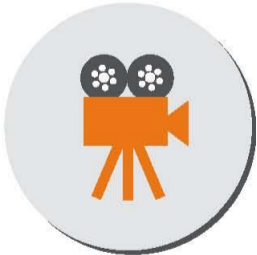

USB Flash Drives standard memory capacity can range from 128MB, all the way up to 64GB.

But what does that mean?

1 GB = **180 digital catalogs** **or**

It also equals 2,800 average size PowerPoint presentations, or 18,874 Word Documents.

Or...

1GB = 230 songs 1GB = 542 digital 1GB = 595 digital 4GB = two feature or 20 albums copies of War and Peace photos length movies
