of digital data saves roughly 50 trees worth of paper

USB Flash Drives standard memory capacity can range from 128MB, all the way up to 64GB.

But what does that mean?

1GB =  **or** 

It also equals 2,800 average size PowerPoint presentations, or 18,874 Word Documents.

Or...

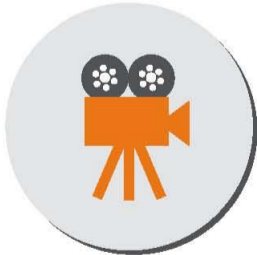

1GB = 230 songs or 20 albums

1GB = 542 digital copies of War and Peace

1GB = 595 digital photos

4GB = two feature length movies
