

Radpad® Shields are scientifically proven to **reduce exposure** to scatter radiation from 50% to **95%**

Scatter Radiation Protection for Surgery Staff and Physicians

Protect yourself and your team from scatter radiation.

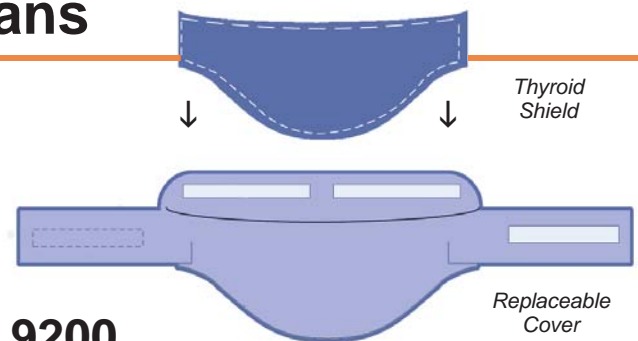

Even with lead aprons, and lead glasses, you leave the most important 25% of your body unprotected against scatter radiation if you're not wearing the RADPAD® Thyroid Shield and the RADPAD® No Brainer®. The RADPAD® Thyroid Shield and No Brainer® provide excellent scatter radiation protection for all fluoro-lab and operating suite personnel during any interventional procedure.

The lightweight, lead-free Thyroid Shield fits nicely into it's fabric, disposable, replaceable cover. Each Thyroid Shield is packaged with an additional cover. Replacement covers are sold separately.

The No Brainer® is lightweight, disposable, and easily adjusted to fit all head sizes. Because it is **lead-free**, it is environmentally safe for disposal.

The comfortable and inexpensive No Brainer® surgical cap and Thyroid Shield will block up to 95% of the scatter radiation that could otherwise adversely impact your health and the longevity of your career.

Let us assist you with product sales/clinical support. Please contact your Vital Care Product Specialist at 800 837 5511 x 200 or sales@vitalcareproducts.com
