

740SELECT™

capsule™

defining connectivity at the point-of-care

Directly input CAS 740 Patient Vitals into VistA/CPRS Utilizing Capsule Tech's Mobile Vitals Plus™ Solution

Automated Vital Signs Data Capture with Mobile Vitals Plus

Designed with nurses, by nurses...

- Integrates with existing technologies, infrastructures and clinical workflows
- Specifically designed for lower acuity environments
- Requires minimal training
 - Log In... Select Patient... Take Vitals... Capture Vitals... Validate and Send

All-in-one Solution

- No additional devices to carry or lose on a busy unit or shift
- Mounts on the CASMED roll stand

Enhances Workflow

- Point of Care Solution: capture, validate and send vitals right from the point of care
- Reduces charting duplication
- Delivers vital signs data to the EMR before the nurse leaves the bedside
- Bar code scanner to capture patient IDN
- Wireless technology for true mobility
- Large colorful touchscreen

Accuracy of Patient Data

- Clinician review and validation before transmitting to EMR
- Minimizes charting errors and improves vitals documentation
- Reduces documentation errors by ensuring vital signs are charted accurately, eliminates omitted and incorrectly transcribed data

Improve Patient Care

- Dramatically reduces time between vitals capture and EMR documentation to mere seconds
- Patient vitals are readily available in the patient's record, improving clinical decision making
- Allows clinician's more time to spend with their patients
