# Diamond Valley Center

*Size: 60,000 Square Feet*

*Location: Hemet, California*

## **Challenge** *Leaking Roof*

- One year old existing roof leaking.
- Needed to meet California's Title 24 and city requirements.
- Complicated penetrations on the roof.
- Drainage problems.

## **Solution** *AcryShield Restoration System*

- Superior waterproofing and reinforced seams.
- Newly restored roof met building requirements.
- Instant Energy Savings.
- Improved building comfort for tenants.
- Leak Free

*After only one year the Diamond Valley Center in Hemet needed major roof repairs for leaks. Inland Pacific Roofing installed an AcryShield Restoration System. Providing their client an excellent waterproofing system with reinforced seams. Drainage was improved with reinforcement on existing drains and new drains were put in. Tenants immediately noticed a cost savings on first utility bill. This client has had better performance from this roof restoration than the new roof installed a year ago.*
