RBX ^{+PLUS} 

PRODUCT BROCHURE

RBX +PLUS BENEFITS

Connecting MOTOTRBO users with the world of telephony

RBX^{+PLUS}

REACH MOTOTRBO RADIO USERS
AND TALKGROUPS FROM ANY PHONE,
ANYWHERE, ANYTIME

MAKE & RECEIVE PHONE CALLS FROM
YOUR MOTOTRBO™ RADIO

ENHANCED WORKER SECURITY

With Teldio's RBX +Plus application, workers in distress can call 911 or security channels within seconds at the push of a button. RBX +Plus also allows phone users to broadcast emergency messages to radio users on the radio network ensuring everyone is notified of the emergency at hand. Remote radio users in distress have access to emergency channels from locations with little or no cell-phone coverage. RBX +Plus enables your organization to respond rapidly to critical incidents when it matters most.

INCREASED PRODUCTIVITY

In a corporate environment staying competitive goes hand in hand with maximizing productivity - this demands the most clear, reliable and flexible communication tools to keep your personnel working efficiently through long shifts. Teldio applications allow your workers to stay connected with their peers and the outside world right from their MOTOTRBO radios. RBX +Plus gives supervisors and managers the ability to reach employees on their radios from any phone, anywhere, anytime. Moreover, individual radio users and talkgroups can make and receive phone calls allowing them to stay connected with management.

SIGNIFICANT COST SAVINGS

Eliminate recurring cell phone costs by implementing RBX +Plus and extending your telephony network's footprint. Teldio's telephone interconnect provides a long-term solution with no recurring costs. An interconnected radio system is a cost effective alternative to expensive Wi-Fi telephony systems; while Wi-Fi networks need access points in every room, two-way radios only require a repeater that can cover a radius of up to 20 miles; penetrating effectively through walls and ceilings. Teldio's solution provides better coverage at a fraction of the cost.

GREATER COVERAGE

RBX +Plus provides mobile telephony coverage where cell-phone providers cannot. By enabling telephony on the customer's radio network, RBX +Plus leverages the powerful range and in-building radio penetration of digital radios. RBX +Plus allows users to place & receive calls anywhere within 20 mile radius of the radio infrastructure. Greater control over your own private mobile telephony network reduces your dependency on cell phone carriers and allows employees to stay connected all the time from anywhere - whether it be from an underground parking lot or a remote campus location where cell phone providers are unable to provide coverage.

TELUDIO CUSTOMER STORIES

JW MARRIOTT - TEXAS, USA

With its newest resort opening its doors in early 2010, the JW Marriott Hill Country Resort wanted to ensure that its new flagship property maintained and even exceeded its already high standards for guest satisfaction. Choosing RBX +Plus and MOTOTRBO solution over cellular push-to-talk technology, the hotel has saved \$14,000 per month in service fees, significantly improved response time to guest requests, and expects to achieve full return on investment within 18 months. With Teldio's RBX +PLUS, hotel management and key employees working on-site or remotely can use mobile or landline phones to place calls that go directly to the radio users on the resort property. Leveraging the Teldio RBX enables third party convention services to contact radio users directly through cell or landline to meet guest needs, speeding response through immediate contact.

BRIDOR - QUEBEC, CANADA

Bridor, a leader in artisan bread manufacturing, is tasked with shipping products on a global scale with little room for error. Effective and reliable communication tools are key to their staffs' productivity and a driver of the company's success.

Shift supervisors, who are often away from their desks, needed the ability to roam freely through the facility without missing important calls. With Teldio's RBX +Plus application they are now able to make and receive phone calls from their MOTOTRBO radios with no recurring monthly fees and do so in indoor locations where cell phone providers cannot provide coverage. With the RBX +Plus twinning feature both their office phone and personal radio are associated with the same number so they never miss a call.
