## Contents

1. What is an IKEA kitchen?
2. What are IKEA kitchens made from?
3. Why are IKEA kitchens so affordable?
4. How do I design an IKEA Kitchen?
5. How much will an IKEA kitchen cost?

# 1.

## What is an IKEA kitchen?

IKEA kitchens have become a very popular alternative to building custom kitchen cabinets. They are a cabinet modular system that can be adapted to just about any kitchen space.

## 2.

# What are IKEA kitchens made from?

The cabinet sides are made from particle board and utilized smart engineering in order to mass produce. IKEA offers a large selection of door panel options. They offer high quality hardwood frame doors but also offer less expensive flat panel MDF material doors. These doors are made from wood particle and glue to produce a more affordable door option.

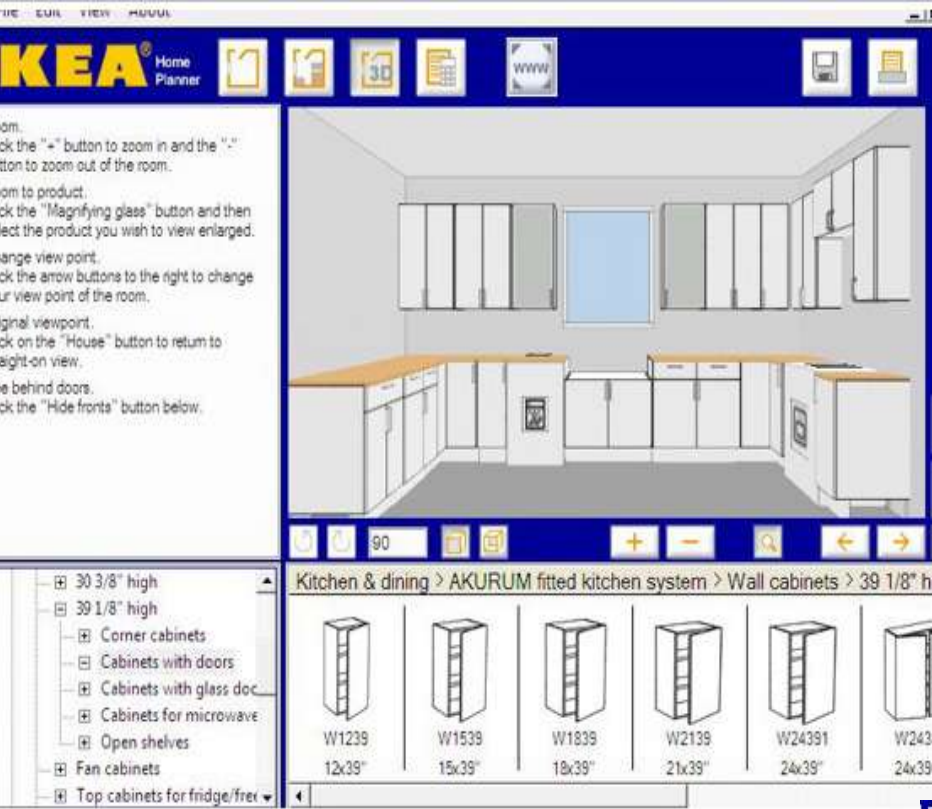

# 3.

## Why are IKEA kitchens so affordable?

IKEA offers some low cost cabinet options by shipping their products in flat boxes. Remember these cabinets are made in China and they travel along way to get to your kitchen. IKEA engineers the box construction with minimal components. They do not use glue, solid backing. The installation of hardware is made easy by IKEA's manufacturing process in order to facilitate onsite assembly and installation.

4.

## How do I design an IKEA Kitchen?

IKEA offers a free online software download. They also offer computer access at their store in order to facilitate you to do your own kitchen layout. The other option would be for you to contact IKEA to do an in home measurement of your kitchen.

5.

# How much will an IKEA kitchen cost?

The style and material composition of the fronts vary in price. The average 10' x 10' kitchen will cost about \$2,500. If you add a soft close hardware, pantry and panels that price and grow to \$3,500. The IKEA installation cabinet installation cost range from \$2,500- \$3,500.
