PositiveVision Now Certified on Peachtree by Sage- Quantum

PositiveVision, now certified on Peachtree by Sage – Quantum, offering an excellent option for companies that need more for less

Chicago, IL, September, 2009 – PositiveVision, a Sage Partner specializing in manufacturing and distribution software now has a new product in its arsenal that delivers more for less to help businesses succeed: Peachtree by Sage – Quantum. Peachtree Quantum offers the simplicity of an integrated accounting solution, with unrivalled performance and unmatched capacity in its class: twice as fast for transaction saves and report generation than its nearest competitor, and capacity for up to 40 named users¹.

“Many companies are being forced to make tough decisions, and are looking to save money wherever they can, without sacrificing operational excellence,” said Bob Baran, President of PositiveVision. “Peachtree Quantum is a perfect solution for mid-sized companies, delivering the advanced functionality they need at an affordable price, and we’re thrilled to now offer it as an option for our customers.”

Peachtree Quantum 2010 includes helpful business management tools, such as Order Process Workflow, Multi-User Management, and a personalized dashboard feature that helps companies cut through clutter and access only the tasks they do on a regular basis.

The ease of use of Peachtree Quantum rivals that of its nearest competitor and is supported by a graphical user interface, set-up guides, and an intuitive navigation system (all of which has been tested and validated in customer resourced usability labs).

Understanding business performance relative to peers - where it stands and where opportunities exist - is also more critical than ever. The Peachtree 2010 family of products features Business Analytics, powered by iLumen², that enables small

businesses to benchmark their own performance compared with others in their industry, and other small businesses overall.

“The current economy is a challenge. Many businesses are actively evaluating their systems to maximize their investment, looking at ways to do more with less,” said Connie Certusi, general manager, small business accounting solutions, Sage North America. “PositiveVision is now better-equipped to assist those companies, with Peachtree Quantum. Now with up to 40 users, it’s an ideal solution for companies that have an eye on growth and are looking for value, or for companies who realize that their current system is more than they need, either from a cost or functionality standpoint, and are looking to switch.”

About PositiveVision:
