

What It Is

Professional Semi-Automatic Drywall Taping and Finishing Tools

These tools are cost-effective, speed productivity, and increase profitability. With all the tools you need, this set is great for a quick start and a perfect finish every time. They are an excellent package to add to the existing tools of the professional taper.

The high quality equipment included in this core set of drywall tools are engineered to be durable, reduce waste, save time, and increase profitability. Simple to use, smooth to operate, and delivering consistent results, the tools have the added benefit of being covered by Can-Am Tool's limited lifetime warranty.

What holds it all together?

The new P300 Hard Tool Case. In addition to its impact-resistant polymer shell, the case is lined with all purpose foam padding which both protects tools, and allows the option of expanding the set.

Strong, versatile, and lightweight, the case will secure your tools during storage and make transport a breeze.

Tool Set Contents

A300

42" Compound Applicator Tube

Our drywall mud applicator tubes are engineered for your toughest demands. They are robust, low maintenance, simple to clean, easy to use, and ensures the smoothest delivery without mess.

E100

Inside Corner Applicator 1"

Designed for smooth movement, the E100 effortlessly applies a uniform ribbon of mud from an applicator tube to both sides of the inside corner.

G200

Flat Applicator 3"

This lightweight applicator head provides easy, fast application of mud to all flat surfaces.

J201

4 Wheel Inside Corner Roller

Create perfect 90° every time with this roller. Its stainless steel wheels firmly embed paper tape easily to form sharp, precise corners.

B100 2 1/2" Standard Flusher

B200 3" Standard Flusher

Interior wall and ceiling inside 90° corners and angles are quickly wiped and feathered smooth to produce crisp, clean surfaces, all in one pass.

2 1/2" corner flushers are typically used when applying the first coat or taping. 3" corner flushers are commonly used for the second, or finishing coat.

D400

Extendable Flusher Handle 3'6" - 6'

Both sturdy, and easy to adjust, this lightweight, twist-locking aluminum handle is designed for use with standard corner flushers.

D500

Extendable Roller/ Sander Handle 3'6" - 6'

Made for use with corner rollers, this flex resistant handle adjusts length with a quick twist, and adapts to hold sanding heads.

P300

Hard Tool Case

Built from sturdy polymer, this case is perfect for transporting your drywall tools from site to site. The all-purpose lining inside gives you space to expand while protecting your tools, and padlock mounts help secure and lock them in when not in use.

Key Features and Benefits

Hard polymer, foam lined, lockable tool case for protection and ease of transport to and from the job site.

Our basic tools for optimal efficiency, combined in one tool case.

Great starter kit that provides higher production in less time.

Functional and easy to use, giving consistent results every time.

Reduce waste, lower expenses, and increase productivity.

Quick user learning curve.

Superior drywall finishing.
