Proven Processes for High Potential Corrosion Areas

Duragalv (DG)

Enhanced hot dip galvanizing for today's steel utilizing environmentally friendly High Grade zinc.

Colorshield (CS)

A translucent polymer coating that is *perfect* for those areas where a hint of color is desired.

Primergalv (PG)

A factory applied universal primer for freshly galvanized steel, which is to receive a field-applied topcoat.

Colorgalv (CG)

A patented and warranted factory-applied architectural color finish for hot dip galvanized steel.

Thermoset (TS)

A high performance, dry applied polyester material that can be applied over ANY metal substrate including aluminum, or "black steel". Ideal for interior applications or wherever "architectural definition" is required

Thermoplex (TP)

A high performance dry applied thermo-plastic elastomeric coating that can be applied over ANY metal substrate including aluminum, or "black steel". Exceptionally durable, it has been proven to withstand 20,000 salt spray testing.

Colorgalv Thermoset (CGTS) and Colorgalv Thermoplex (CGTP)

Where extreme corrosion is a concern, Duncan Colorgalv Thermoset and Duncan Colorgalv Thermoplex are designed to be applied over a freshly galvanized surface.
