January 23, 2009

Reference: Pauli Systems Inc., Fairfield, California

To whom it concerns:

In 2007 Lockheed Martin Aeronautics Company provided to Hellenic Aerospace Industry S.A. of Schimatari, Greece a state of the art dry paint stripping facility for aircraft as part of our industrial cooperation obligation to the Government of Greece associated with a recent purchase by the Hellenic Ministry of National Defense of F-16 aircraft. The facility was built in record time, five months, with the highest quality in cooperation with Emvatis S.A. of Athens, Greece and Pauli Systems, Inc. of Fairfield, California.

As the individual responsible for the project I interfaced with the two contractors on an almost daily basis and can state without reservation that Pauli Systems and specifically Bob Pauli demonstrated the highest level of integrity in all phases of the project, that the project was delivered on time, on budget and with an extraordinary level of quality in the products and services provided.

The transparency in dealing with Pauli Systems, Inc. was exemplary, their timeliness in responding to our numerous inquiries and requirements was excellent, and it was a true delight to work with the company. I and the others within Lockheed Martin Aeronautics that were involved with Pauli Systems would unequivocally support working with Pauli Systems in the future and would highly recommend the company to others who are looking for similar products.

Respectfully,
