

The Bay Area Leader in Artificial Turf®

Product Comparison

Not all artificial turf products are the same – each product type has unique features and benefits that are optimal for a specific purpose. For example, if you have flooding problems or a few large dogs, you’re probably looking for synthetic grass with superior drainage to keep your lawn dry. If you are planning a play area for your children, you may want something with good fall protection ratings. Our Product Comparison guide will help you decide what kind of artificial grass is right for you.

Features:

- Multiple Shades and Textures
- Superior MaxxFlow Backing
- 1” - 2” Pile Height
- ASTM Fall Rating
- Eco-Friendly Infill Options
- 51oz. - 90oz. Face Weight

Benefits:

- Minimal Maintenance, No Watering
- Superior Drainage Capabilities
- Antimicrobial and Hypoallergenic Surface
- Helps Keep Pet Areas Clean
- Safe and Non-toxic Infill
- Fertilizer and Pesticide Free
- Recycled & Recyclable

General Purpose Sport Definition: This product will be used daily Example: Actively used sporting green		●		●	●		●
Drainage or Standing Water Issues Definition: This product will be used daily Example: Residential or commercial use	●	●	●		●		

Product Profile

1. **Thatch** (this type of product has the most density, but still requires sand, envirofill, or shell tech infill)
2. **Infill** (this type of product is best suited for athletic and recreational fields)
3. **Low-Infill** (this type of product requires minimal infill and is used for putting greens and bocce courts)

Product Backing

1. **MaxxFlow or Flow Through:** Provides the best drainage, used for most installations including landscaping, dogs, and erosion control
2. **Hole Punch:** This type of product typically has weed barrier built in
3. **Non-permeable:** Limited drainage. Only used with putting green and bocce products.

ASTM Fall Rating

1. American Society for Testing and Materials (ASTM for establishing performance rating and fall protection standards)
