

“Spurring Development of Bioenergy in Texas”

**Cindy Thyfault, President
Westar Trade Resources
Dallas, Texas
November 13, 2007**

What Has Happened:

1. **Bioenergy firms are well-established in Texas, with new plants and operations coming on line.**

What Has Happened:

1. Bioenergy firms are well-established in Texas, with new plants and operations coming on line.
2. **Larger corporations are getting involved.**

What Has Happened:

1. Bioenergy firms are well-established in Texas, with new plants and operations coming on line.
2. Larger corporations are getting involved.
3. **Partnerships are forming.**

1. Bioenergy firms are well-established in Texas, with new plants and operations coming on line.
2. Larger corporations are getting involved.
3. Partnerships are forming.
4. **New technology is developing.**

What Has Happened:

1. Bioenergy firms are well-established in Texas, with new plants and operations coming on line.
2. Larger corporations are getting involved.
3. Partnerships are forming.
4. New technology is developing.
5. **Feedstock prices for some industries have increased, putting pressure on profitability.**

What Has Not Happened:

1. Continued support by Governor and state government.

What Has Not Happened:

1. Continued support by Governor and state government.
2. Continued support by Senators Hutchinson and Cornyn.

What Has Not Happened:

1. Continued support by Governor and state government.
2. Continued support by Senators Hutchinson and Cornyn.
3. **Sustainable energy lobby has not been able to compete with the lobbying by the Texas Cattlefeeders Association and the Oil and Gas Associations, among others.**

What Has Not Happened:

1. Continued support by Governor and state government.
2. Continued support by Senators Hutchinson and Cornyn.
3. Sustainable energy lobby has not been able to compete with the lobbying by the Texas Cattlefeeders Association and the Oil and Gas Associations, among others.
4. **Passage of the 2007 Farm Bill.**

What Has Not Happened:

1. Continued support by Governor and state government.
2. Continued support by Senators Hutchinson and Cornyn.
3. Sustainable energy lobby has not been able to compete with the lobbying by the Texas Cattlefeeders Association and the Oil and Gas Associations, among others.
4. Passage of the 2007 Farm Bill.
5. **Passage of the 2007 Energy Bill.**

What Can Our Industry Do:

1. Understand that one industry will not make or break this current trend.

What Can Our Industry Do:

1. Understand that one industry will not make or break this current trend.
2. **Become more proactive as individual companies—write letters, make phone calls, and meet with local, state and federal legislators.**

What Can Our Industry Do:

1. Understand that one industry will not make or break this current trend.
2. Become more proactive as individual companies—write letters, make phone calls, and meet with local, state and federal legislators.
3. **Band together with other related industries to lobby to pass the Farm Bill and Energy Bill.**

What Can Our Industry Do:

1. Understand that one industry will not make or break this current trend.
2. Become more proactive as individual companies—write letters, make phone calls, and meet with local, state and federal legislators.
3. Band together with other related industries to lobby to pass the Farm Bill and Energy Bill.
4. **Continue to pursue grants and loans from the USDA, DOE, and the Texas Emerging Technology Fund.**

What Can Communities Do:

1. Start a community “Sustainable Technologies Committee” through your local chamber of commerce or economic development group.

What Can Communities Do:

1. Start a community “Sustainable Technologies Committee” through your local chamber of commerce or economic development group.
2. **Get involvement from your local city government, regional Council of Governments, USDA, EPA, and the Texas Department of Agriculture.**

What Can Communities Do:

1. Start a community “Sustainable Technologies Committee” through your local chamber of commerce or economic development group.
2. Get involvement from your local city government, regional Council of Governments, USDA, EPA, and the Texas Department of Agriculture.
3. **Provide three things:**
 - a) **Networking**
 - b) **Education**
 - c) **Legislative Advocacy**
