## TECHNICAL ASSESSMENT CHECKLIST

FOR BIOREFINERY ASSISTANCE PROGRAM GUARANTEED LOANS

Committed to the Future of Rural Communities

Name of Project:	State:
Tips:	
	our technical assessment in the order specified in this document.
Address each issue – if the issue is not app	
	o substantiate your explanation (e.g. letter from county on permits, etc)
	chnical assessment is required for each project.
	demonstrate that the project design, procurement, installation, startup,
operation and maintenance of the	ne project will operate or perform as specified over its useful life in a nner, and must identify what the useful life of the project is.
	also identify all necessary project agreements, demonstrate that those
agreements will be in place on o	or before the time of loan closing, and demonstrate that necessary will be available over the useful life.
	ed must follow the format specified in this section.
	submitted in other formats. Design drawings and process flow charts
are encouraged as exhibits.	submitted in other formats. Design drawings and process now charts
	ified in this section is not necessary if the topic is not applicable to the
specific project.	illed in this section is not necessary if the topic is not applicable to the
Questions identified in the Agen	cy's technical review of the project must be answered to the Agency's
satisfaction before the application	
All projects require the services	
1. Qualifications of project team	or a professional engineer (1 L).
	ding to the complexity and scale of the project.
	monstrated expertise in similar advanced biofuel technology
development, engineering, insta	
	ect team service providers have the necessary professional credentials
	m the required services for the development, construction, and
	nnology for producing advanced biofuels must be provided.
	e that vendors of proprietary components can provide necessary
	he biorefinery to operate over its useful life must be provided.
The application must:	, ,
	elivery method. Such methods include a design, bid, build where a
	design the project and prepare a request for bids and the successful
	the Borrower's risk, and a design build method, often referred to as
	tablishes the specifications for the project and secures the services of a
developer who will design and b	ouild the project at the developer's risk;
	echnology equipment manufacturers of major components being
_	h of time in business and the number of units installed at the capacity
and scale being considered;	
	ers' qualifications for engineering, designing, and installing advanced relevant certifications by recognized organizations or bodies.
Provide a list of the same or sim	nilar projects designed, installed, or supplied and currently operating
and with references if available;	
	refinery operator's qualifications and experience for servicing,
operating, and maintaining such

2. Agreements and permits (cont'd)  Advanced biofuels refineries must be installed in accordance with applicable local, State, and rodes and regulations.  Identify zoning and code issues, and required permits and the schedule for meeting those requand securing those permits.  Identify licenses where required and the schedule for obtaining those licenses.  Identify land use agreements required for the project and the schedule for securing the agreements and the term of those agreements.  Identify any permits or agreements required for solid, liquid, and gaseous emissions or effluent the schedule for securing those permits and agreements.  Identify available component warranties for the specific project location and size.  Identify all environmental issues, including environmental compliance issues, associated with the project.  3. Resource assessment  Adequate and appropriate evidence of the availability of the feedstocks required for the advance biofuels refinery to operate as designed must be provided in the application.  Indicate the type and quantity of the feedstock including storage, where applicable.  Indicate shipping or receiving method and required infrastructure for shipping, and other apprositance transportation mechanisms.  For proposed projects with an established resource, provide a summary of the resource.  4. Design and engineering  Authoritative evidence that the advanced biofuels refinery will be designed and engineered so meet its intended purposes, will ensure public safety, and will comply with applicable laws, reg agreements, permits, codes, and standards must be provided in the application.  Projects shall be engineered by a qualified entity.  Biorefineries must be engineered as a complete, integrated facility.	as to

Projects shall be engineered by a qualified entity.  Biorefineries must be engineered as a complete, integrated facility.	
Biorefineries must be engineered as a complete, integrated facility.	
The engineering must be comprehensive including	
site selection,	
systems and component selection, and	
systems monitoring equipment.	
Biorefineries must be constructed by a qualified entity.	
The application must include a concise but complete description of the project including	
location of the project;	
resource characteristics, including the kind and amount of feedstocks;	
biorefinery specifications;	
kind, amount, and quality of the output; and	
monitoring equipment.	
Address performance on a monthly and annual basis.	
Describe the uses of or the market for the advanced biofuels produced by the	
biorefinery.	
Discuss the impact of reduced or interrupted feedstock availability on the biorefinery's operation	ns.
The application must include a description of the project site	
and address issues such as site access,	
foundations,	
backup equipment when applicable, and the	
environmental information documents Form RD 1940-20 and required narrative in	
the 7 CFR part 1940, subpart G, Exhibit H format.	
Identify any unique construction and installation issues.	
Sites must be controlled by the eligible Borrower for at least the proposed project life or for the	
financing term of any associated federal loans or loan guarantees.	
5. Project development schedule	
Each significant task, its beginning and end, and its relationship to the time needed to initiate a	nd carry
the project through startup and shakedown must be provided in the application.	· · · · ·

# TECHNICAL ASSESSMENT CHECKLIST

FOR BIOREFINERY ASSISTANCE PROGRAM GUARANTEED LOANS

Committed to t	the Future of Rural Communities
Project deve	elopment schedule (cont'd)
Р	Provide a detailed description of the project timeline
in	ncluding resource assessment,
pı	roject and site design,
pe	ermits and agreements,
e	quipment procurement, and
pı	roject construction from excavation through startup and shakedown.
6. Equipmer	nt procurement
A	demonstration that equipment required by the biorefinery is
a	vailable and can be procured and delivered within the proposed project development
S	chedule must be provided in the application.
	tiorefineries may be constructed of components manufactured in more than one location.
	Provide a description of any unique equipment procurement issues such as
	cheduling and timing of component manufacture and delivery,
	rdering,
	varranties,
	hipping,
	eceiving, and
	n-site storage or inventory.
	nt installation
A	full description of the management of and plan for site development and systems installation,
	etails regarding the scheduling of major installation equipment needed for project construction, and
	description of the startup and shakedown specification and process and
	ne conditions required for startup and shakedown for each equipment item individually
	nd for the biorefinery as a whole must be provided in the application.
	ns and maintenance
	The operations and maintenance requirements of the biorefinery necessary for the biorefinery to
	perate as designed over the useful life must be provided in the application.
	The application must also include:
	nformation regarding available biorefinery and component warranties and availability
	f spare parts;
	description of the routine operations and maintenance requirements of the
	roposed biorefinery,
	ncluding maintenance schedule for the mechanical, piping, and electrical systems and system
	nonitoring and control requirements,
	s well as provision of information that supports expected useful life of the biorefinery and
	ming of major component replacement or rebuilds;
	discussion of the costs and labor associated with operations and maintenance of the biorefinery and
	lans for in-sourcing or outsourcing.
	description of the opportunities for technology transfer for long term project operations and
	naintenance by a local entity or owner/operator; and
	Provision and discussion of the risk management plan for handling large, unanticipated failures of
9. Decommis	najor components.
	<b>y</b>
	When uninstalling or removing the project, a description of the decommissioning process.
A	description of any issues, requirements, and costs for removal and disposal of the biorefinery.

11-25-08
