EXPERT PCI DSS CONSULTANCY

> " Achieving PCI compliance is a highly specialized process. We can help you understand your obligations, and achieve them in the most efficient and sensible way possible "

In partnership with

GlobalCollect's clients need to consider the PCI Compliance implications of handling consumer payment information. Alina Consultants is on hand to help navigate this environment.
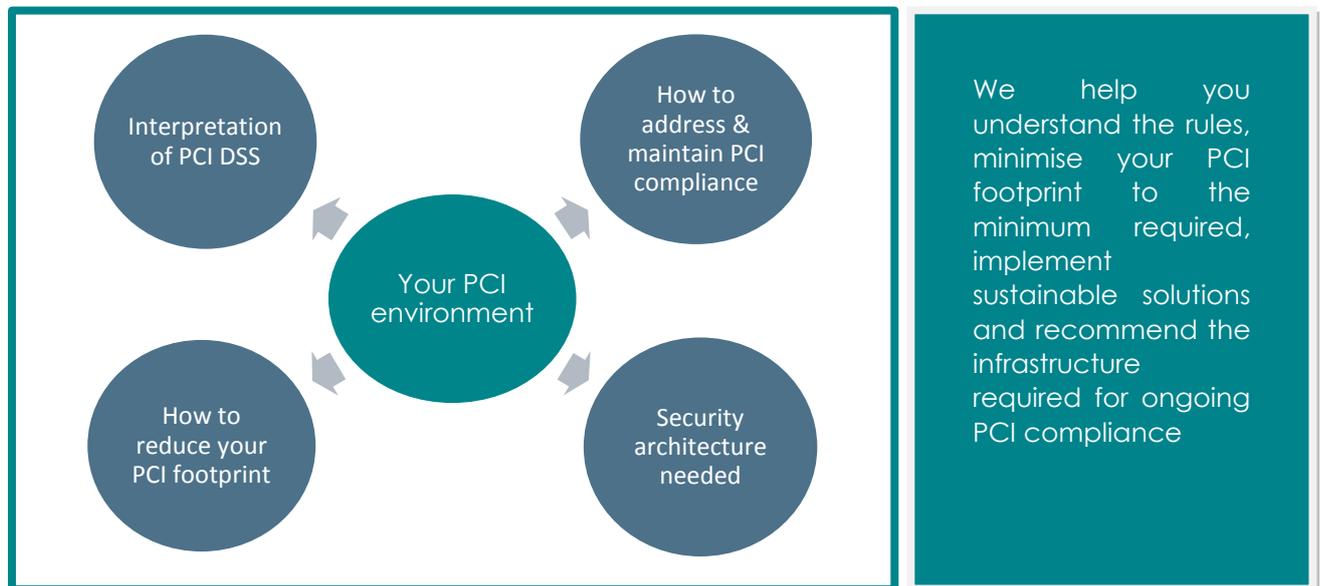

The Payment Card Industry Data Security Standard (PCI DSS) is a set of requirements designed to ensure that ALL companies that process, store or transmit credit card information maintain a secure environment. Alina Consultants represent you directly and unequivocally. We have no relationship whatsoever with any vendor, technology or service provider. Thus we have no interest apart from our client in mind when we recommend any service or application.

Alina Consultants

So what should you consider?

If you process, store or transmit credit card information <u>you need to be PCI compliant.</u> There are serious consequences for failure to achieve PCI compliance.

PCI DSS is administered and managed by the PCI SSC (www.pcisecuritystandards.org), an independent body that was created by the major payment card brands (Visa, MasterCard, American Express, Discover and JCB). Achieving PCI compliance is a highly specialized process that requires a deep knowledge of ecommerce protocols, business operations, security and, a detailed understanding of the Data Security Standard.

What we offer?

Interpretation of PCI DSS

How to address & maintain PCI compliance

Your PCI environment

How to reduce your PCI footprint

Security architecture needed

We help you understand the rules, minimise your PCI footprint to the minimum required, implement sustainable solutions and recommend the infrastructure required for ongoing PCI compliance

What next?

Alina Consultants use a four step process with clear deliverables at each step, to ensure ongoing validation and achievement of the agreed objectives. This ensures full stakeholder sign-off and satisfaction throughout the project.

Validation of Compliance Level → Gap Analysis of Site → Project scoping to address gaps → Creation of documents to validate compliance
