

GlobalCollect Elevate Data Services

“

Elevate was specifically designed to provide the insights into the payment process that help grow your business

”

Elevate is a browser-based Business Intelligence solution for payments and chargebacks. Based on market demand, it was specifically designed to extract actionable insights from your raw payment data.

Key Benefits include:

- See all your payment data in an interactive, easy to view format
- Convert browsers into purchasers
- Access ready-made management reports on all payment and fraud KPI's
- Identify opportunities to increase conversion rates and reduce chargebacks and fraud

Key Features

- Elevate is browser-based, making it time, place and device agnostic
- Raw data is organized in over 20 dashboards in 5 key performance areas
- All dashboards are designed based on input from merchants to answer real-world business questions
- Elevate insights can easily be exported and shared for management reporting

Insights from Elevate

Elevate not only shows you important metrics such as:

- Conversion rates
- Authorization rates
- Chargeback rates
- Refund rates
- Average Transaction Values
- Rejection reasons
- Consumer distribution
- Consumer drop-off rates

But it also lets you filter these metrics by country, payment method, currency and account, as well as over time.

“

Optimize your online payments and fraud detection with advanced data analytics from GlobalCollect

”

Why use Elevate?

Your payment data contains valuable information to help you optimize your business. With insights from Elevate:

- You take informed decisions
- You take decisions quicker
- You have a better understanding of opportunities and threats
- You can predict and anticipate
- You improve the bottom line
