

## Portable Light Kit for ZScape™ Color Holographic Prints

The Portable Light Kit is a lightweight, freestanding lighting solution for Zebra Imaging color holographic prints. Fast-and-easy setup on the floor or a tabletop, makes it ideal for business development and semi-permanent display needs.

Lighting distance and angle is critical to image accuracy. The flexible design supports multiple sizes and formats. A turntable enables rotation of horizontal prints for viewing of nearly infinite perspectives and multiple channels. An optional integrated shelf supports incline prints for viewing at a distance.

\$349 suggested retail price. Contact us at [information@zebraimaging.com](mailto:information@zebraimaging.com)

### ZScape™ Color Holographic Prints

Our holographic prints immediately engage clients as your 3D image floats above and below the film plane. And your image can be seen from multiple perspectives simultaneously.

ZScape prints are ideal for your business development, tradeshow exhibit, or model-replacement needs.

- Accelerate decision-making and reduce costly errors
- Leverage your 3D data and workflow investments
- Show your clients your innovative ideas
