About the Presenter

Wendy Gustafson WGustafson@fullsailpartners.com Wendy oversees accounting and human resources at the firm. She previously, provided consulting and training services to Full Sail clients providing them insight on accounting processes and Deltek Vision functionality.

With 25 years of accounting experience, including 12 years in the architectural and engineering industry, she is always prepared to guide clients developing financial solutions and best practices using Deltek Vision[®].

What Should I Consider

- **1.** Industry Standards
- 2. Different Segments Finance, Marketing, Operations, Employee
- 3. Data Currently Tracked
- 4. New Data needed

Industry Standards

- **1.** Any Business can use:
 - Profit and/or Gross Margin Percentage
 - DSO (Days "sales" outstanding) or Avg Days Outstanding
 - Staff Turnover
 - Current Ratio
- **2.** Professional Services:
 - Utilization
 - Labor Multiplier
 - \$ per hour Billed

Different Areas

1. Accounting/Finance:

- Profit and/or Gross Margin Percentage
- Overhead Rate
- Current Ratio

2. Marketing

- Hit Ratio
- Leads Generated
- Days in Pipeline

3. Management

- DSO (Days "sales" outstanding) or Avg Days Outstanding
- Client Satisfaction
- Days in Backlog

4. Employees

- Utilization
- Staff Turnover
- Training

Data Needed

- What information is needed for your metric?
- What do you track now?
- Most Firms already track
 - > Revenue
 - > Expenses
 - > Accounts Receivable
 - > Payables
 - > Staff count
- Some Firms already track
 - > Real Backlog
 - > Billable Hours

What New Data Needed

- Do you have a consistent process for backlog updates?
- Do you track Billable hours for fixed fee jobs?
- Do your have consistent process for billing adjustments/write offs?
- Can you measure your pipeline?
- Can you measure your Hit Ratio
- Do you have an employee training program to keep up with industry changes?
- Do you survey your clients to get their feedback about your processes and performance?

What Can I Already Get Out of Vision

How to Set Up Customization

Data Types	Function
Character	A field that is stored as a text field and limited to 255 characters
Checkbox	A checkbox
Currency	A numeric field that displays to two decimal points
Date	A date field
Numeric	A numeric field that displays to 9 decimal points
URL	Creates a hyperlink to a site outside Vision or an Email

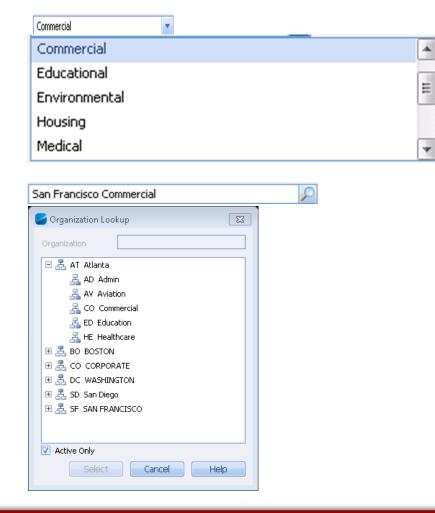

The following "Data Types" create a hyperlink into the applicable info centers:

Account	Marketing Campaign
Client	Opportunity
Vendor	Organization
Employee	Project
Lead	Text Library

How to Set Up Customization

The following "Data Types" allows you to create custom lists:

Stored Procedures to Update all Data

- 1. Stored Procedures requires advanced programming knowledge and SQL experience.
- 2. When doing any functions using stored procedures create the procedure in test first
- 3. Only allow qualified personnel in your database

Stored Procedures can Pull Data Into Data Tabs

Other Options - VPM

© Copyright 2015 Full Sail Partners, Ltd. - All Rights Reserved

The Deltek Vision Performance Management (VPM) module is intended to provide your firm with easily accessible, graphical performance data based on your existing Vision data. VPM is intended as a complement to, not a replacement of, your current Vision reporting functions/schedules.

VPM comes with 2 components:

- 1. Analysis Cubes: Analysis cubes are partially pre-calculated data that is structured to allow access to your transactional data while still providing efficiency in processing. The Analysis Cubes do not provide access to your LIVE data but are calculated on a schedule (usually nightly) that you can control for your company needs.
- 2. Presentation: The Presentation component is a business intelligence solution from Tableau. This solution accesses the analysis cubes (standard use) or SQL data (advanced use) to allow powerful graphical representations of your company's position for the metrics that mean most to you.

1. Your data is entered and maintained in the Vision system

				0		-	

- 1. Your data is entered and maintained in the Vision system
- 2. Data is stored in a table format. Analysis Cubes summarizes the data much like pivot tables in Excel
- **3.** VPM Displays the data in Vision in graphical (if desired) format

Analysis Cubes are separate from VPM and Vision. They are accessible from programs such as Excel. They work like pivot tables.

VPM takes the data stored in the tables and makes it available on interactive dashparts within Vision. This example is a Deltek Standard Dashpart that is geared to a project manager looking at the financial performance of their ongoing projects.

The fields at the top allow the manager to drill down on the Client, Project Status, Project and/or year
