**OSHA General Safety Programs
Bloodborne Pathogens
Satisfies 29 CFR 1910.1030 (g)**

Applicability:

Applies to workplaces where employees may be subject to blood or other potentially infectious materials.

Prerequisites:

None

Frequency and Duration:

This training program requires 2 hours to complete and shall be provided at the time of initial assignment. Completion of annual refresher program is required.

Purpose and Overview:

Safety Training Services, Inc. will conduct Bloodborne Pathogens training and review procedures needed to avoid diseases spread through contact with blood and/or certain body fluids, or articles that are, or may be, contaminated by blood or body fluids. This training is intended to help employees work safely and to comply with the OSHA Bloodborne Pathogens Standard (29 CFR 1910.1030 [g]).

After attending the class participants will understand and be ready to explain:

- Incident and exposure protocols, as well as post-exposure medical follow-up procedures.
- Work practices geared to reduce exposure risks.
- Engineering controls and how they are used and maintained.
- The purpose of personal protective equipment, where it is kept, and when it must be used and how.
- Procedures for handling and disposing of wastes.
- Procedures for handling contaminated laundry and personal clothing

Training Materials: Each participant will receive copies of the presentation materials, and a certificate of completion will be awarded at the conclusion of the session.
