

Real Experience. Real Training. Real Results.<sup>SM</sup>

**OSHA General Safety Programs  
Hazard Communication Training  
Satisfies 29 CFR 1910.1200**

**Applicability:**

All employers are required to provide information to their employees about the hazardous chemicals to which they are exposed by means of a hazard communication program, labels, and other forms of warning, safety data sheets (SDS), etc. The standard also applies to any chemical that is known to be present in the workplace in such a manner that employees may be exposed under normal conditions of use or emergency.

**Prerequisites:**

None

**Frequency and Duration:**

This training program requires up to 4 hours to complete.

**Purpose and Overview:**

Safety Training Services, Inc. will conduct a training program that satisfies the OSHA Hazard Communication Standard (29 CFR 1910.1200) to ensure that the purpose and function of the program is understood by all employees. Participants will be provided with:

- Information about the hazardous chemicals to which workers are exposed, by means of a hazard communication program, labels and other forms of warning, SDS, and information and training.
- Information about operations in their work area where hazardous chemicals are present.
- Information about location and availability of the written hazard communication.
- Information about Global Harmonizing System (GHS)

**Training Materials: Those attending this training program will receive a training manual and a certificate of completion at the conclusion of the session.**
