

Your proven leader in the Data Center and
Critical Facility construction process since 1995

Alcatex, Inc.

Capabilities Statement

Data Center and Critical Facility Construction

Alcatex, Inc. is committed to providing turn-key solutions for Data Center Design & Build. From the initial planning stages to the final completed facility, you can trust Alcatex to deliver a state-of-the-art system that incorporates the technology you need with the safety precautions that will put your mind at ease.

When designing your Data Center, Alcatex engineers will work with you to create a customized facility that is tailor built for your needs and optimizes your available resources. As one of Texas' fastest-growing tech companies, we are confident you will be pleased with the result.

Since 1995, Alcatex has successfully completed national turn-key Data Center projects on time and on budget. Visit www.alcatex.com to view recent projects.

Capabilities

- › Engineering services
- › Turn-key construction
- › Uninterruptible power supplies
- › Cabling-fiber
- › Backup generators
- › Switchgear and gear packages
- › Data center cooling solutions
- › Fire suppression
- › Raised flooring
- › Demolition services
- › Consolidation consulting
- › Design consulting
- › Architectural design and drawings
- › Scheduling and management
- › Network architectural
- › Migration services (hardware and software)
- › Data Center energy efficient solutions
- › Data Center equipment maintenance contracts

At Alcatex, we specialize in Data Center and Critical Facility construction. We are committed to all your backup power and turn-key computer room construction and installation needs. As the computer industry changes, so should your Data Centers and computer rooms. Advances in computer designs over the past few years have altered the required environmental conditions for successful Data Centers. Through experience and increased awareness, Alcatex is ready to tackle the pressures and problems that many companies encounter.
