

# See the shot. Hear the shot. Repeat the shot.

*For the first time in the history of the game Noah™ makes this possible.*

See the perfect shot. Hear the perfect shot. Practice the perfect shot -- and shooting percentages increase, guaranteed. The Noah™ Select Shooting System aligns simply on the sideline and provides objective feedback for every shot taken. Players self-correct, practice the right shot and scoring percentages improve.

**See the perfect shot:** Noah™ Vision tracks and records each shot taken. Players, for the first time ever, can see their shot from release point to basket using Noah™ Video and Arc Plot features.

**Hear the perfect shot:** Noah™ Voice announces the angle of the arc with each shot taken. Once Noah™ Voice is turned on, the angle of each shot is announced. If the player's optimal scoring arc is 44 degrees, and the shot was announced at 41 degrees, the player knows the shot was too flat.

**Practice the perfect shot:** When you know better, you do better. Once a player understands what the perfect shot looks like and sounds like, they begin to build muscle memory. Repetition and reinforcement increase shot consistency and shooting percentages increase.

## Noah™ Improves Shooting:

- Helps players build muscle memory
- Assists players to regain their shot after an injury
- Corrects flat or high shooters by encouraging them to stay within the range of their optimal medium-height scoring arc
- Helps players regain confidence and recover from shooting slumps quickly
- Improves 3-point shooting
- Enhances team practice
- Boosts consistency in great shooters
- Provides valuable reports and tracking features

*"We use Noah because it works."*

**Don Meyer, Head Coach**  
Northern State University

## Bring your best shot to every game with Noah

*Noah increases shooting percentages guaranteed.*

**Build Muscle Memory:** Instant Noah Voice Feedback helps players rapidly build strong muscle memory. Players learn the feel of shooting the ball the correct distance and arc with every shot.

**Flat Shooters Raise the Shot:** Instant Noah Voice feedback tells shooters after each shot if their arc is too low. The player has the feedback to self-correct the shot and burn in the correct muscle memory for a new medium-height arc that scores.

**End the Slump:** Noah provides the antidote to the dreaded shooting slump so the shooter can refresh their muscle memory and build confidence.

**Track Player Improvements:** Noah provides coaches with reports on every team member. Know instantly who is improving and who needs more work. Identify inconsistent shooters and work to perfect their shot. When a team practices with Noah games are won.

**Team Practice Works:** Noah Feedback can be integrated into team practice without changing the practice schedule or flow. Multiple players can shoot at the same time.

**Recover after an Injury:** A strained muscle or knee seriously impacts a player's shot performance. Once the player is ready to resume practice Noah Voice provides instant feedback which assists the player in regaining their former shot.

**Generate Camp Revenue:** Host the Basketball Camp that truly benefits players. Noah is printer ready which allows you to provide an arc plot to each camp participant with a picture and their Noah Session plotted. The arc plot indicates the shooter's Skill Level.

**Improve 3-Point Shooting:** Noah also measures longer shots. Practice 3-Point shooting with Noah and watch the scoreboard. When players shoot with an optimal medium-height arc and build correct muscle memory teams score more points.

**Good Shooters Find Greatness:** Only with Noah is the shot arc visible, articulated, recorded and compared. The shooter can now see the arc, hear the arc and self-correct shot-by-shot. 15-minute Noah Sessions along with regular practice rapidly accelerates the path to greatness.

# Increased Shooting Percentages, Guaranteed.

**Jaclyn Bisordi, CA**  
Before Noah: 25% 3-PT 29 for 116 with 33 Assists  
After Noah: 47% 3-PT 47 for 120 with 75 Assists

## Noah Select Shooting System

*Noah™ Increases Shooting Percentages, Guaranteed.*

The patented Noah™ Select combines machine vision technology, speakers and powerful Noah™ software into a user friendly, one-of-a-kind coaching tool.

- **Instant Noah™ Voice feedback** (angle and distance)
  - Objectively ranks skill levels
  - Instant **video review of shot mechanics**
  - Coaching reports **track player improvements**
  - **Practice as you do now**
  - Teams **practice with multiple players**
  - Lines up simply on the sideline
  - Multiple teams in one system
  - Printer ready to **provide Player Arc Plots**
  - **Dell™ laptop computer included**
  - Noah™ software pre-loaded
  - Sturdy **steel frame construction**
  - Handle and wheels for easy maneuvering and set-up
  - State-of-the-art **Machine Vision Technology**
  - **Proven effective in scientific studies**
- \$5,599 plus shipping and handling**
