

MedicsRIS™ and Merge's

iConnect® Network:

Advanced Data Systems (ADS), a leading provider of radiology-specific automation solutions, is now partnered with Merge Healthcare to provide iConnect Network, an

advanced interoperability network that enables providers and imaging centers to exchange imaging information electronically with community physicians that are connected to health information exchanges or EHR networks.

Why iConnect Network?

- iConnect Network is enabled via MedicsRIS.
- Radiology reports are automatically transmitted to your referring physicians via its partnership of networks.
- Not just transmitted...the reports are received directly into your referring physicians' EHRs.
- Reports can contain a link instantly displaying the patient's images, eliminating the usually-required second, separate step in retrieving images.
- Transmission via iConnect Network and its partners is done using modern web-based technologies.
- iConnect Network will help referring physicians meet Meaningful Use Stage 2 imaging requirements.

What's more, there is no cost to referring physicians for their ability to obtain your reports through MedicsRIS and iConnect Network. All of this, without having to build expensive, point-to-point interfaces.

Eliminate the faxing scenario and ensure your reports are delivered securely, directly to the referring physician's EHR. You'll know when they are received, your MedicsRIS system will know and so will your referring physicians.

Contact ADS for more information on MedicsRIS and iConnect Network because in Radiology today, having the right connections means everything!

ADS... All You Need Is Us™!
