

YES Shop Management

More Functions

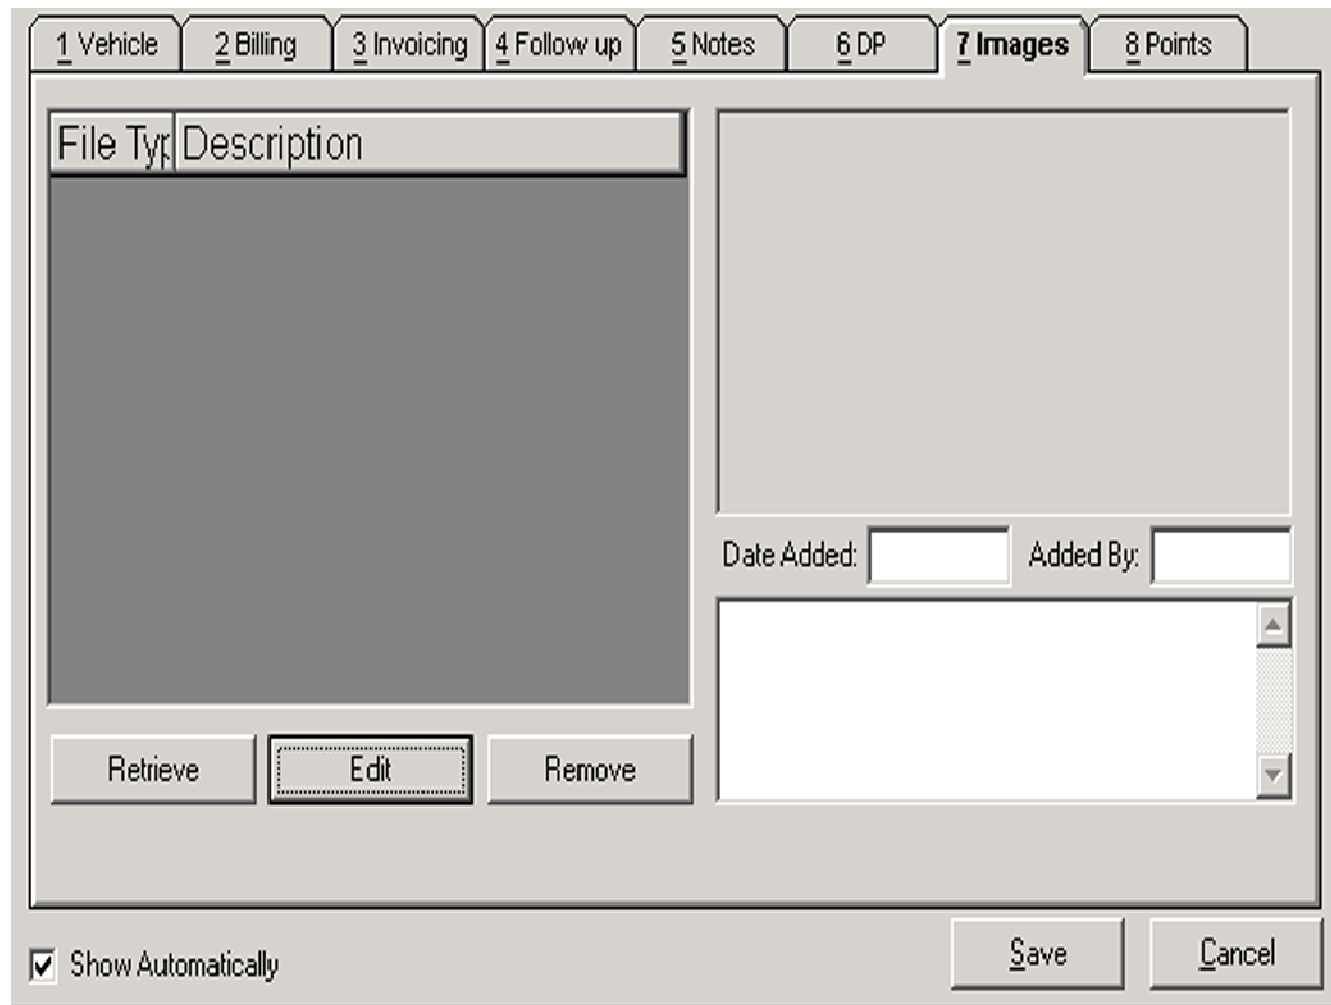

Pace Software has created different functions in our shop management systems to help in organizing information and saving time.

The screenshot displays a software interface with a menu bar at the top containing tabs for '1 Vehicle', '2 Billing', '3 Invoicing', '4 Follow up', '5 Notes', '6 DP', '7 Images', and '8 Points'. The '5 Notes' tab is selected and highlighted with a red border. Below the menu bar, the interface is divided into two main sections: 'Customer:' and 'Vehicle:'. The 'Customer:' section is a large blue text area, and the 'Vehicle:' section is a white text area. Both sections are outlined with a red border. At the bottom of the interface, there is a checkbox labeled 'Show Automatically' which is checked, and two buttons labeled 'Save' and 'Cancel'.

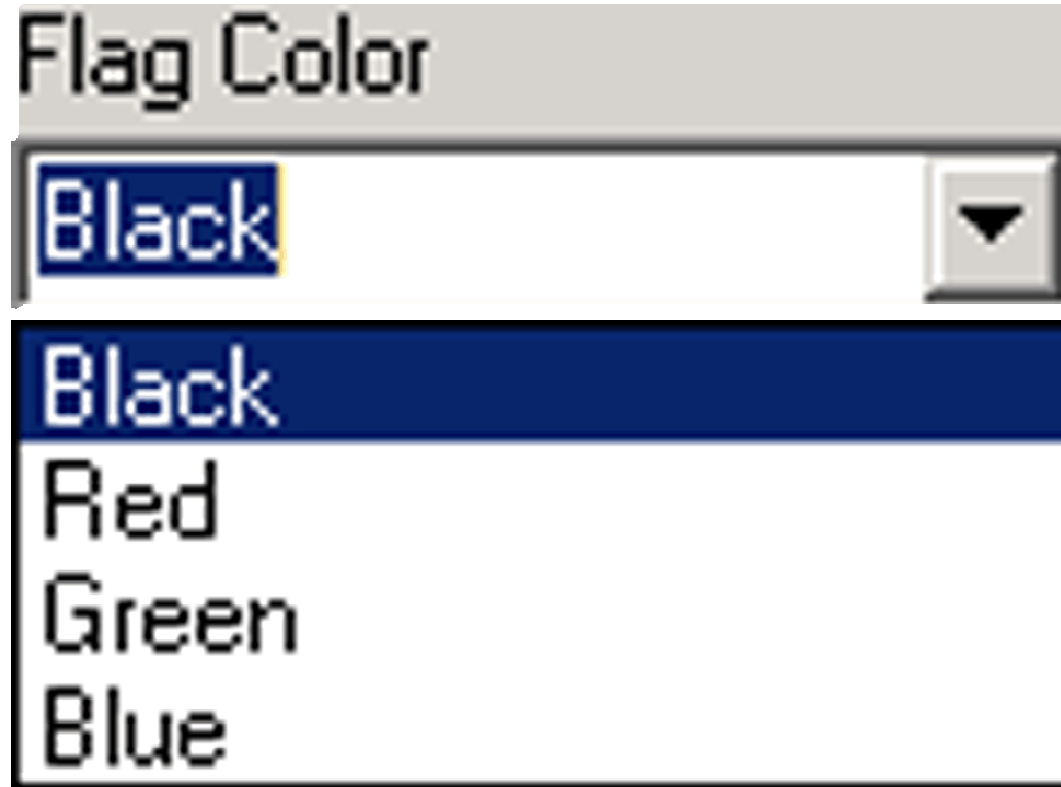

In the notes section you can place notes in the customer area that will attach to every vehicle the customer brings to your shop.

The vehicle notes area are notes specific to this vehicle.

This is for internal use only, the customer will never see these notes.

Easily upload images to keep them in the customers records.

You can color code the customer information in order to track things that are important to your shop. Example: All of my fleet customers show up in blue.
