

Fluensee AssetTrack Integration

Asset Track from Fluensee is tightly integrated with RF Code's active RFID asset tracking products. The integrated solution provides real-time asset location and inventory information enabling asset to property managers to improve and optimize their asset management processes.

Fluensee Overview

Fluensee's RFID-enabled asset tracking and management solutions improve the visibility, accuracy, security and utilization of a company's mobile and fixed assets. Its end-to-end solutions combine highly configurable and patented software and implementation services with hardware from leading RFID, barcode, GPS and sensor technology providers. Fluensee offers its browser-based, enterprise-class AssetTrack™ solution that tracks IT assets, pallets, tools, equipment and all types of other high-value assets, along with its Yard™ application that is designed to efficiently manage assets in transportation and distribution environments.

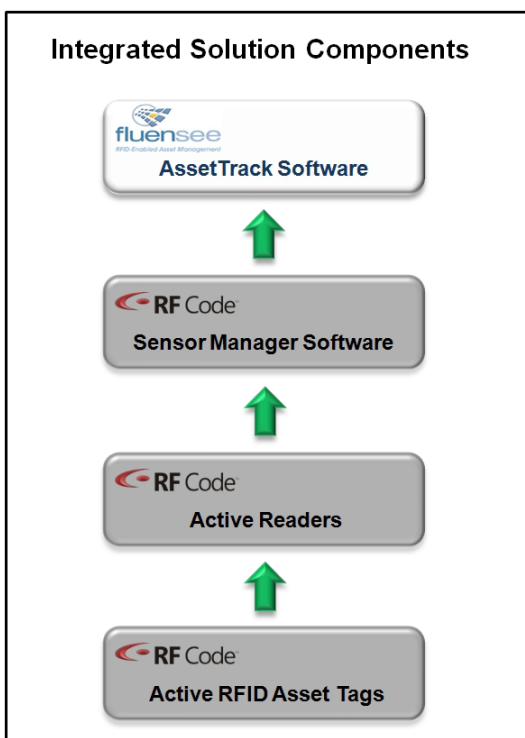

Integration Details

By integrating with RF Code's Zone Manager software, Fluensee's AssetTrack application has full access to all real-time asset information originating from RF Code's active RFID tags. AssetTrack incorporates the following fully automated active RFID information from Zone Manager:

- Tag location
- Tag status (online/offline)
- Tag motion status
- Tag low battery indicator

AssetTrack is a proven, cost-effective RFID-enabled software solution that allows companies to significantly improve the visibility, security and utilization of their physical assets. Asset track has the ability to work with a wide variety of auto-id systems in addition to RF Code such as passive RFID, GPS and barcodes.

When combined with RF Code's technology, AssetTrack provides real-time visibility of critical assets and enables automation of the business processes associated with asset lifecycles. The automation of managing physical assets enables organizations to save significant labor, time and money.
