Asset Management Solutions

## Sunflower Systems Overview

Sunflower Systems is an enterprise asset management solutions and software company specializing in the deployment of software tools and business processes to simplify asset management tasks. Sunflower's portfolio of solutions enables organizations to improve decision-making, accountability and regulatory compliance for all types of assets including personal property, real property, IT assets, materials, vehicles and more. Sunflower Systems offers a wide range of services including software implementation, training, consulting and operational support. Sunflower Systems has been serving the property management needs of federal government agencies, universities, government contractors and national laboratories since 1997.

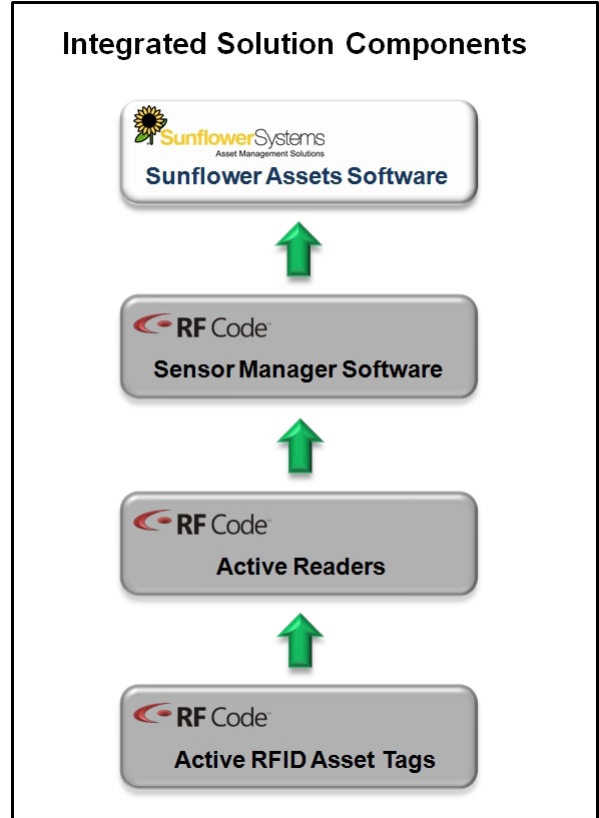

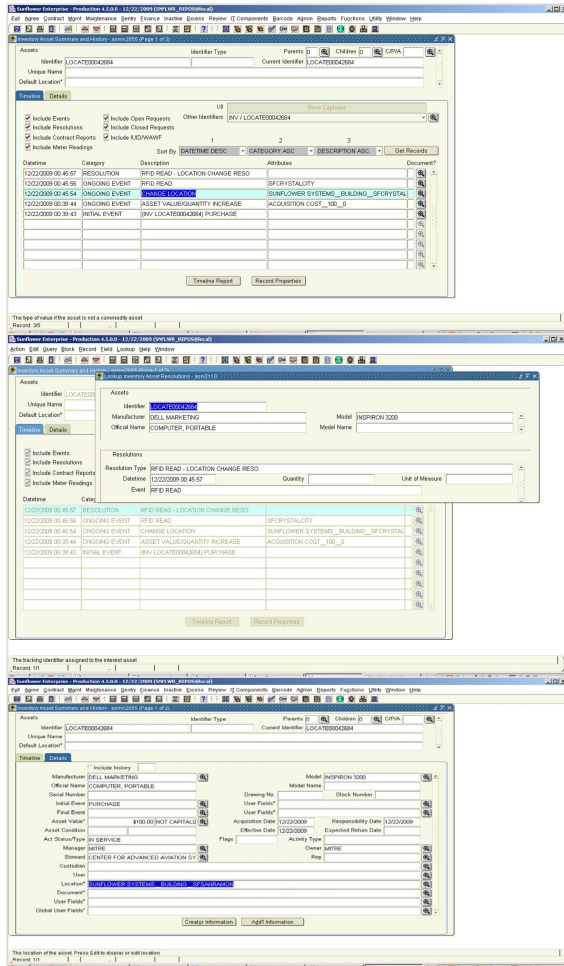

## Integration Details:

Sunflower Assets provides tracking physical and financial accountability for all assets from acquisition through disposal. By integrating with RF Code's Zone Manager, Sunflower Assets leverages the RF Code solution in the following ways:

- RFID asset location is included in the asset details view
- RFID asset location is included in the asset timeline view
- All historical RFID asset location change events are in the asset timeline view
- RFID asset location is included in the inventory physical resolution view
- Email Notifications can be generated automatically for asset events

By seamlessly integrating the RF Code location information, Sunflower users have real-time asset inventory and location data at their fingertips when viewing asset details, producing asset reports, and resolving asset inventory discrepancies. The combined solution from RF Code and Sunflower enables organizations to save time, labor and money by eliminating manual asset management tasks.
