

SurfCote[®] KS-9 Polymer-Encapsulated Sulfate of Potash 0-0-50

GUARANTEED ANALYSIS

Soluble Potash (K ₂ O)*	50%
Sulfur (S)*	17%
17.0% Combined Sulfur	

Derived From: Polymer-Coated Sulfate of Potash

* All of the nutrients have been polymer-coated to provide 50 percent coated slowly available Soluble Potash (K₂O) and 17 percent coated slowly available Sulfur (S).

Rough or abusive handling of this product during blending or application can result in abrasion of the polymer coating, resulting in alteration of its characteristic release pattern and dissolution properties. Sampling and analysis of the final blended product should be done at set intervals to ensure that specific controlled-release nutrient claims are met.
