Dordan to Display Popular Bio Resin Show N Tell at the International CES, Including highly-anticipated “Algae-Plastic”

The International CES (CES) is a major-technology related trade show held each January in the Las Vegas Convention Center in Las Vegas, Nevada. Not open to the public, the Consumer Electronics Association-sponsored show hosts previews of products and new product announcements.

Las Vegas—January 8, 2013—First time exhibiting consumer electronics packaging specialist Dordan Manufacturing will be displaying its popular Bio Resin Show N Tell at Internal CES; this exhibit is a compilation of Dordan’s R&D into bio-based/biodegradable/compostable resins that can be used in consumer product packaging.

The Show N Tell, first unveiled at Pack Expo 2010 and brought back by popular demand in 2011 and 2012, now has 9 alternative materials profiled, including comparative performance and cost analysis. Materials sampled include: Cellulous acetate, PHA, TerraPET™, PLA & starch, PLA, Oshenite’s “annually renewable” calcium carbonate and PP, DPET, and ALGIX’s “algae-plastic.”

Located in the Sustainable Planet Tech Zone in the Venetian Ballroom, booth #70326, Dordan Manufacturing looks forward to showcasing the various sustainable materials included in its Show N Tell with the CES community; in doing so, Dordan hopes to enhance the dialogue surrounding sustainable plastics in order to situate the consumer electronics industry with the tools available in the development of more sustainable packaging systems.

Dordan CEO and President Daniel Slavin comments, “What began as a simple investigation into the performance of this new class of “green” materials has become a powerful educational tool, intended to share with interested parties the application and performance of these new materials. As custom thermoformers, it is our pleasure to speak to these issues; in doing so, we hope to position our clients with the information needed to select the best material for the job.”

About Dordan Manufacturing Co. Inc.

Incorporated in 1962, Dordan is a Midwestern based, National supplier of custom designed thermoformed packaging solutions like clamshells, blisters, trays and components for the consumer goods and electronics industries. Dordan will be exhibiting at International CES January 8-11, 2013, booth # 70326. Learn more at www.Dordan.com.
