

# MyCrestron Residential Monitoring Service

## Setup Instructions

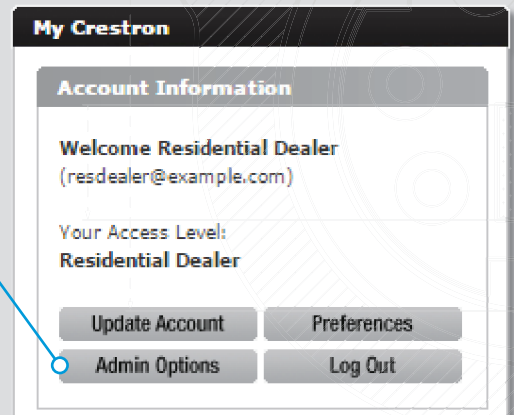

**1** Log into the Crestron Website at [www.crestron.com](http://www.crestron.com)

**2** Activate the service

Click the Admin Options button in the Account Information section, located in the upper right-hand corner. (If you do not see the Company Administration screen, you do not have Dealer Admin access).

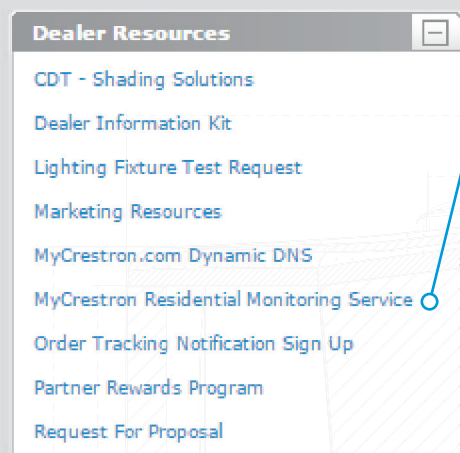

Select "Yes" to initiate the MyCrestron Residential Monitoring Service for your company and complete activation by clicking the "Update Subscription Choice" button. In addition to you, all users listed as Current Admins will have access to this service. Add or remove users by clicking Change Permissions.

### MyCrestron Residential Monitoring Service

Select 'Yes' to initiate the MyCrestron Residential Monitoring Service for your company. In addition to you, all users listed as *Current Admins* will automatically be granted access. *Current Users* can be granted access by clicking the 'Change Permissions' button next to his or her name in the section below. To complete activation, click the 'Update Subscription Choice' button. To access your project dashboard, click on the 'MyCrestron Residential Monitoring Service' link under Dealer Resources in the lower right corner of this page.

☒ Yes ☐ No

**3** To access your project dashboard, scroll down to the Dealer Resources section and click "MyCrestron Residential Monitoring Service."

**4** The portal will open and you can add your Pyng hubs. Just follow the Getting Started instructions or watch the quick video on setting up your dashboard.
