

## **Live Scan Connectivity Information**

Collectors using direct connection Livescan will need to register on the National Fingerprint Collection Clearinghouse (NFCC) site, [www.natacompliance.com](http://www.natacompliance.com), to obtain their ID and password and in order to submit live scan data.

The Collector will be contacted with a test date and after successful completion, will then be given an operational date.

NFCC accepts submissions using VPN transmissions.

All VPN and routing issues need to be determined, configured, and tested by the Collector before installation.

The VPN specifications are given in the technical documentation published in the Collector section of the NFCC web site.
