

**“Our IT system, with the help of Annese, will be fully integrated and interconnected so that not only is there redundancy and back-up between buildings, but the services will all be able to talk to one another.”**

**—Tony Alotta**  
*Baptist Health System*

## Industry Insights

Today, the average hospital network runs more than 300 applications. Patient data is scattered across disparate systems in public and private entities, and it can be difficult for healthcare professionals to share vital medical, clinical, and patient information without the right infrastructure in place.

With rising healthcare costs, staffing shortages, and stricter mandates for improved delivery of care, medical workers are under significantly more pressure to make informed, life-threatening decisions, often at a moment’s notice. IT is inseparable from business and care processes. The right technologies can dramatically improve efficiencies throughout medical environments.

- Providers can communicate with patients and specialists more effectively.
- Medical personnel can instantly connect with the people, information, and devices they need to deliver optimal patient care.
- Medical records can be accessed readily to avoid performing redundant tests.

- Care can be extended to underserved or rural populations.
- Doctors can diagnose and treat patients remotely.
- An improved workflow would devote more time to patient care as opposed to administrative functions.

Because healthcare providers face continual pressure to be accessible, affordable, and responsive, they rely on technology to achieve essential objectives—better quality of care, improved workflow efficiencies, and protection of patient information.

### *Connections to the Future*

Annese is a technology solutions integrator connecting devices to networks, people to people, and ideas to action. Guided by our services methodology, we provide an end-to-end IT experience, implementing the tools of today and designing for the emerging technologies of tomorrow.

Let Annese be your connection to the future. Start here: [www.annese.com/LearningCenter](http://www.annese.com/LearningCenter).
