

“Annese and Associates’ highly skilled network engineers and superb project management truly made the infrastructure upgrade a painless experience. With Annese, we were able to complete the installation very quickly and make the transition seamless to our users.”

—Kevin Stillman
SUNY Central Administration

Industry Insights

A solid education is ultimately about achieving one thing—employability. In today’s economy, employers are highly selective which pressures educational institutions to equip the future workforce with skill-sets that will stand out in a sea of resumé’s.

Where hard copy textbooks and lecture-based instruction once reigned, the Internet, mobile communications, and social networking have forcefully emerged and begun to permeate. Each semester, students are walking through campus doors with more technical knowledge and higher expectations of their college/university to ensure that classrooms are highly relevant to real world dynamics.

Whether it involves connecting your students with experts outside the institution, rich multimedia course work, or collaborative learning opportunities, the 21st century classroom now reaches past the walls of a lecture hall to create a community of engaged lifelong learners.

Colleges and universities are focused on ensuring that students are ready for the careers that await them when they graduate and enter the workforce. Create a connected learning environment that delivers quality education to students.

- Reach new learners beyond the campus.
- Attract the best students and faculty.
- Improve collaboration.
- Provide lifetime learning.
- Cut costs and streamline administrative and operational processes.
- Increase safety and security.

Connections to the Future

Annese is a technology solutions integrator connecting devices to networks, people to people, and ideas to action. Guided by our services methodology, we provide an end-to-end IT experience, implementing the tools of today and designing for the emerging technologies of tomorrow.

Let Annese be your connection to the future. Start here: www.annese.com/LearningCenter.
