

Document Management

For HP MFP's & ScanJet Scanners...

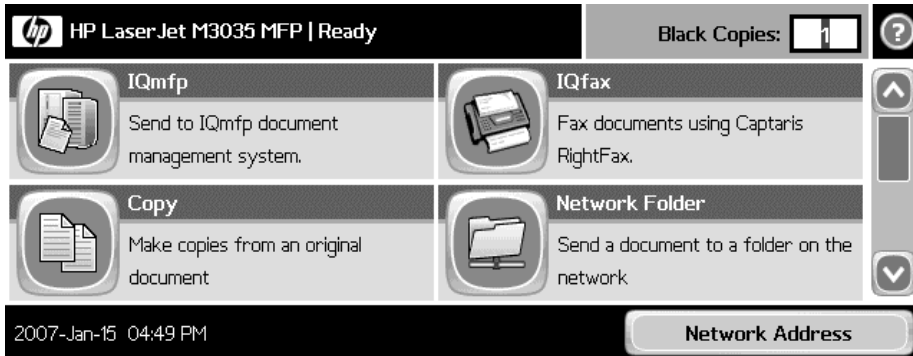

... is not Rocket Science!

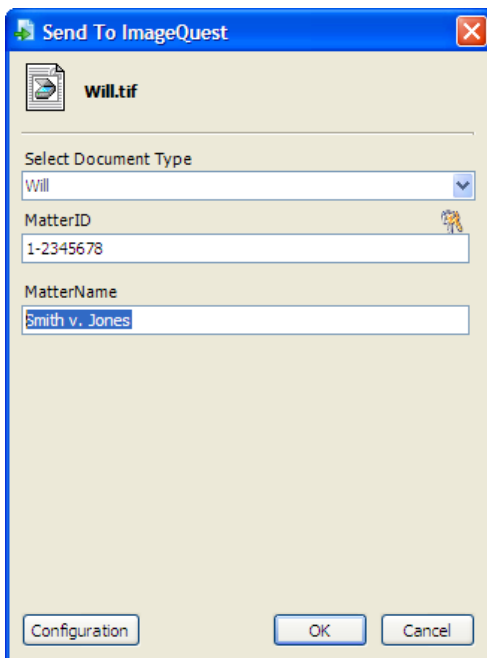

Why Document Management?

- Escape the problems associated with paper filing — lost or pulled files, needless photocopying, and other costly paper-processing challenges
- Easily categorize and index scanned, faxed or other electronic documents
- Conveniently look up and retrieve documents using Web-based search from any PC on the network
- Integrate seamlessly with the network to improve the efficiency of your entire organization

Simple software and familiar hardware that works the way you do!

- Reduce costs related to storage and free-up valuable office space
- Help ensure compliance with government regulatory requirements
- Protect against potential loss and damage caused by natural disasters
- Enhance information security

Documents are displayed using the industry-standard Adobe® Acrobat Reader®. With full-text searches you can jump from term to term within the displayed document.

Search any document or file, including full-text

Return on Investment and Disaster Recovery

Finding and retrieving a document using an electronic filing system is significantly faster than the same process with a paper-based system. IQmfp quite simply eliminates the effort spent filing, searching, retrieving and re-filing paper documents. The amount of time saved is enormous and gives a business the option of either re-allocating an employee's time to more productive tasks, or reducing the size of its workforce.

Why ROI and DR under the same heading? Of what value are your paper files and documents in the event of a natural disaster? This question makes it obvious why one of your major concerns about ROI should focus on business continuity.
