

Enterprise Document Management for the Mid-Market

Fortis for Healthcare:

A prescription for paper woes

Fortis is an integrated document management system that captures, manages and retrieves medical, administrative and financial documents, images and files.

Insurance Billing

Fortis addresses the insurance billing area by capturing EOBs, diagnostic coding, and patient invoicing into one easy-to-use system. Benefits are;

1. Measurable savings in filing (real estate and manpower) costs,
2. Reductions in mis-coding, and
3. Improved collections.

Medical Records

Fortis provides a secure repository for all forms of medical records: scanned paper, lab reports, notes, dictation, medical imaging and correspondence. Benefits of the Fortis medical record repository are;

1. Eliminate paper medical records.
2. All medical records are now fully text searchable, so a patient's information is found fast and there are no longer lost files.
3. Lab reports, notes and the like can now be merged with electronically captured medical images to create a composite file.
4. The care-giver, in any remote location, can instantly access a patient's complete file, improving quality of care.

Lakeshore Bone and Joint - put their entire medical billing and EOB function into Fortis with an immediate improvement in administrative effectiveness, customer service, and receipts.

Florida Medical Center Clinics - store all of their patient records in the Fortis system, saving \$1.3 million/year in records administration costs.

Huntsville Cardiothoracic Surgeons - converted all of their medical records to the Fortis system, and are now able to call up any patient record within 4 seconds, resulting in better service and quality of care.

Banner Healthcare Network - manages all credentialing records and limits the enterprise liability through the Fortis system.

Patient Experience and Care

Fortis impacts patient registration and workflow, speed of care and portability of records.

Quality

Fortis captures and secures patient records in every format from images, notes, audio to lab reports. Fortis makes these records fully searchable and remotely accessible.

Facility and Safety

Fortis is a repository for facility management information.

Insurance and Administration

Fortis provides a solution for capturing and managing the insurance billing, EOB, and accounts payable processes.

Compliance

Fortis is a secure repository for managing HIPAA and DEA compliance and staff credentialing.

Fortis for Healthcare: Managing Unstructured Content

Fortis provides one document management backbone that integrates with your administrative and business systems.
