

### ***Pharmacist's Letter:***

## Unbiased, Actionable Drug Therapy Information You Can Use Today

**M**ore than ever before, pharmacy practice is enormously exciting, rewarding, and challenging—and evolving at an ever-accelerating pace. To deliver the highest standard of patient care, pharmacists must keep abreast of enormous amounts of complex information—from the latest FDA approvals, quality improvement initiatives, and Star Ratings, to drug-related information in the consumer press. Staying on top of all this can be overwhelming, so pharmacists need timely, reliable information they can trust.

For over 30 years, *Pharmacist's Letter* has been the go-to source for actionable information on drug therapy. It helps pharmacists understand the latest drug developments, avoid medication errors, enhance patient adherence, and improve care and outcomes. The *Letter* is published by Therapeutic Research Center, the leading advisory and education service on drug therapy and medication management.

### **Learn Fast . . . Learn What Matters Most**

Every month *Pharmacist's Letter* provides content on the field's hottest topics with input from our highly respected editors and professional Clinical Recommendations Panel . . . and from readers themselves.

The *Letter* distills this vital information into a few concise paragraphs that quickly get to the heart of the matter. It provides clear recommendations and helps pharmacists gain an objective perspective on the issues that matter most. The *Letter* accepts no advertising or big pharma-generated content. It's everything the pharmacist needs to act on new drug-related developments immediately. . . all in one place.

### **Pharmacy Practice from the Pharmacist's Perspective**

*Pharmacist's Letter* keeps professionals informed and at the top of their practice. It focuses on a broad range of topics. If you see it in pharmacy practice, we cover it in the *Letter*. Our recommendations help pharmacists:

- Compare the efficacy of various drug therapies
- Learn about first-line disease treatments
- Make evidence-based recommendations to patients and prescribers
- Understand how to handle drug interactions
- Improve medication adherence
- Educate patients effectively
- ... and much more

### **A World of Added Resources**

Along with all this, a subscription to *Pharmacist's Letter* also includes invaluable:

- *PL Detail-Documents* that dive deeper into the background behind our monthly recommendations.
- *PL Charts* covering drug classes, dose comparisons, adverse reactions, interactions, and more.

- *PL Patient Education Handouts* designed to share patient-friendly tips and advice on the safe and effective use of medications, supplements, devices, and more.
- *PL Rumor vs Truth* providing facts behind hot media topics to give you answers before patients ask.
- *PL Toolboxes*, designed to help improve patient care by combining all available resources on the most common conditions in one convenient place.
- *Preceptor Training & Resource Network* with a broad selection of live and homestudy CE courses, a toolbox of resources and learning activities, and training documents—all focused on supporting mentoring efforts.

### Earn CE Credits

Pharmacists can also earn CE credits in many ways . . . by passing an online quiz after reading evidence-based recommendations in each issue, taking an online course, or participating in one of our monthly live webinars.

Plus, the *PL CE & Training Organizer* makes it simple to list and track completed courses all in one place. The *Organizer* even auto populates with available Therapeutic Research Center courses that meet state and national requirements as well as necessary Medicare compliance and competency courses based on your specific profile. And it even sends documentation of course completion directly to NABP.

Our ongoing commitment to meeting the needs of the nation's pharmacists continues to grow and evolve with the times. We continue to address all the most important issues in contemporary pharmacy and take advantage of new communication channels and technologies to provide broad-based access to our vital information.

### Therapeutic Research Center

Therapeutic Research Center is the only large independent organization of its kind specializing in actionable recommendations on drug therapy and medication management. In addition to its highly regarded *Letters*, Therapeutic Research Center provides advisory services, databases, interactive resources, live webinars, drug comparisons, patient education, continuing education programs, learning management systems, and online competency and compliance training programs. Every month over 400,000 prescribers, pharmacists, and pharmacy technicians rely on our advisory services to help them improve medication use, prevent medication errors, and improve patient care and outcomes.
