Natural Medicines:

Introducing! A new and improved natural medicine resource.

Natural Medicines is the most authoritative resource available on dietary supplements, natural medicines, and complementary, alternative, and integrative therapies. Our newly enhanced product provides the best features and functionality from both Natural Standard and Natural Medicines Comprehensive Database, as well as new clinical features that weren't available before.

Also available on your smartphone or tablet

Here's a quick look at some of the features that are, or will be, available when you subscribe:

- Over 90,000+ new commercial products including product data and evidence-based NMBER® rating system
- Interaction checker featuring the ability to check interactions between all drugs and 90,000+ commercial dietary supplements and natural ingredients
- Drug-supplement interaction data including evidence-based interaction ratings
- Effectiveness Checker that enables quick comparison of the effectiveness of different natural medicines for a specific condition
- Comparative Effectiveness Charts that will allow you to do a quick comparison of the effectiveness of different natural medicines for specific conditions
- Additional databases including hundreds of topics on Health and Wellness and Sports Medicine
- Enhanced Interaction Checker and Nutrient Depletion Checker interface
- Pregnancy and Lactation Checker and Adverse Effects Checker

- Patient handouts and consumer education monographs available in English, Spanish, and French
- CE Center with 30+ clinical management-focused programs on common disease states and 100 natural ingredient programs based on monographs
- Natural MedWatch which provides adverse event reporting at the point of care and allows you to quickly submit adverse event reports related to dietary supplements, print reports for patient charts, and data share with colleagues
- Clinically relevant, bottom-line focused information and ratings in our evidence-based natural ingredient and health & wellness monographs
- In-depth evidence tables and a more comprehensive review of evidence resulting from the merging of the two databases and expert resources
- And more!
