

Software Release Notes

Part Number: SW90118
Description: Power Control Center (PCC)
Release Number: 1.14
Release Date: 9/18/2013

New Features:

- New version waits longer after issuing a Configuration Reload command before attempting to read back the target's configuration parameters - this is meant to give the target enough time to reboot (including the embedded bootloader timeout) before trying to read from the target. Text is now displayed near the "reload" button during this time stating "Rebooting Target...".

Bug Fixes:

- N/A

Compatibility Notes:

- This version of the PCC tool requires Microsoft .NET Framework 4 to be installed on the user's PC. To install .NET Framework 4, see the following link:
