Pile Height: 1 3/8"

Perforations: No

Applications:

This is a non-infilled high grade polypropylene yarn system designed for heavy traffic tee lines, hitting mats, and extended use golfers. This product is used by many of the top 1 golf courses in the US. This product holds a real tee and allows players to hit all clubs, from a wedge to a driver. This product does not replace the real grass, it gives the grass time to heal properly. This product can be installed outdoors or indoors on a compacted aggregate base or on concrete.

These specifications are standard and may vary slightly due to manufacturing tolerances or consumer specifications.
