

Magento on AWS

Managed by Tenzing

Tenzing's Magento Optimized Hosting on AWS is reliable, scalable, secure and optimized for Magento. It combines the flexibility and scalability of the AWS platform with Tenzing's round the clock support, customized managed services and ecommerce expertise. By investing in Magento you've chosen a powerful platform to deliver your online shopping experience, don't let your infrastructure hold it back. Tenzing provides infrastructure and managed services to some of the worlds' leading retailers and can help you make the most of your platform investment.

Built for Performance

Optimize your site performance and protect your customer experience with a scalable solution that guarantees you only ever pay for the infrastructure you need. No more. No less.

Managed by Experts

Skip the heavy lifting, save on development costs and stop worrying about site availability and performance with Tenzing's round the clock monitoring and support.

Trusted by Merchants

With AT 101 SOC-2, ISO27001 and PCI DSS certifications, solid partner relationships and ITIL based policies and procedures, you can be assured that your environment is in good hands.

BUILT FOR PERFORMANCE

Magento on AWS, managed by Tenzing allows you to dynamically grow and shrink your environment. Tenzing will help you scale seamlessly during busy periods, allowing you to pay only for the infrastructure you use. Worries about site availability and performance will be a thing of the past with Tenzing ensuring your site scales on an as needed basis.

Leverage the full power of Magento with a reference architecture that optimizes your site performance and ensures reliability. Amazon Aurora delivers up to five times the throughput of standard MySQL running on the same hardware, and at Tenzing we've integrated Aurora into our Magento 2 offering. Tenzing customers can also take advantage of Amazon Cloudfront CDN to speed up the delivery of their entire website using a global network of edge locations. On top of that, we support industry leading software including Varnish and Solr Search – allowing you to leverage the best available tools to build your site.

- **Leverage Amazon Infrastructure**
AWS designs its datacenters to deliver high performance, scalability, security and redundancy. Each region of operation includes multiple availability zones, sophisticated cloud orchestration and routing technologies, high-speed network connectivity, and intelligent network storage delivered seamlessly as a service.
- **Industry Leading SLAs and Built in DR**
Tenzing backs its Magento Optimized Hosting on AWS offering with industry leading SLAs that go far beyond typical infrastructure uptime SLAs. We offer two options, a 99.99% Site Availability SLA and a 100% Site Availability SLA. Both give you greater peace of mind that your Magento store will run smoothly. Our standard solution also includes two options for disaster recovery.

With Magentos new cloud friendly licensing model, designed with scalable environments in mind, there has never been a better time to explore Magento on AWS, managed by Tenzing.

Magento on AWS

Managed by Tenzing

TRUSTED BY MERCHANTS

Tenzing Datacenters

Tenzing was one of the first hosting providers to be validated through Magento's updated partner program, and was the first to offer managed services for Magento on AWS in North America. We are also an AWS advanced consulting partner, and based on our technical proficiency and proven success delivering ecommerce solutions, were one of the inaugural partners for their commerce competency program.

We work closely with leading systems integrators, bringing tools and processes to support organization and accountability. Our tried and tested Magento RACI matrix allows us to set expectations and processes with all project partners. Our ITIL based change management procedures ensure that environment changes are carefully reviewed and approved to avoid any negative impact on your sites performance.

Defense in Depth Security

Tenzing's security is based on a defense in depth approach. Our system is built to insure the availability, confidentiality and integrity of our systems and data. Both Amazon and Tenzing are PCI DSS compliant and we help ensure ongoing compliance by applying the latest patches and firmware to your environment.

MANAGED BY EXPERTS

Configuring, deploying, monitoring, managing and maintaining AWS infrastructure is complicated. Optimizing it to run your Magento store is even harder. Tenzing manages this complexity for you 24x7x365 with a team of Magento and AWS experts leveraging industry leading ITIL-based processes design specifically for ecommerce.

We're a team of ecommerce experts that allow you to skip the heavy lifting while we worry about provisioning, scaling and managing your infrastructure. Our team will configure and optimize your web servers, app servers and databases, allowing you to save on development costs. We'll also set up custom monitoring and alerts based on your business requirements - and when those alerts are triggered, we'll respond immediately. Our support team will also manage the security of your environment, your disaster recovery services and if necessary, we deploy a comprehensive operational and escalation protocol to mitigate any security risk to your site.

ABOUT US

Tenzing delivers solutions and services that enhance performance, maintain security and simplify compliance for retailers and manufacturers. By combining deep technical expertise with exceptional service delivery and support, Tenzing helps clients alleviate risk and maximize revenue from their digital investments. Tenzing deploys, manages and optimizes software and infrastructure for leading commerce platforms from partners such as Oracle, Hybris, Magento, and IBM. With offices and customers in the Americas, EMEA, and APAC, Tenzing is regularly recognized as a high-growth company and industry leader. Tenzing is SSAE16 Type II, ISO 27001, PCI-DSS and VISA PCI Certified. Tenzing also partners with Amazon for the global delivery of managed commerce services on AWS.
